Author: Pezzarossa, A.
Title: Imaging plasma membrane domains in signal-transduction pathways
Issue Date: 2012-03-13

Imaging plasma membrane domains in signal-transduction pathways

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P. F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 13 Maart
klokke 11.15 uur

door

Anna Pezzarossa

geboren te Parma, Italië
in 1982

Promotiecommissie

Promotor:	Prof. dr. T. Schmidt
Referent:	Prof. dr. J. Piehler (University of Osnabrück, Osnabrück, Germany)
Overige leden:	Dr. ir. E.J.G Peterman (Vrije Universiteit Amsterdam)
	Prof. dr. E.R. Eliel
	Prof. dr. M. Orrit
	Dr. ir. S.J.T van Noort

Casimir PHd series, Delft-Leiden 2012-5
ISBN 978-90-8593-117-1

Het onderzoek beschreven in dit proefschrift is onderdeel van het wetenschappelijke programma van de Stichting voor Fundamenteel Onderzoek der Materie (FOM), die financieel wordt gesteund door de Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO).

Contents

1 Introduction **1**
1.1 Membranes 2
1.2 Diffusion and other means of cellular transport 2
1.2.1 Fluorescent proteins for life cell imaging 7
1.3 Single-molecule fluorescence microscopy 10
1.3.1 Microsecond tracking 12
1.4 Analysis of single-molecule data 14
1.4.1 Tracking algorithm 14
1.4.2 Particle image correlation spectroscopy 16
1.4.3 Particle image cross-correlation spectroscopy 17
1.4.4 Fitting the Probability Distribution Function 18
1.5 Application: H-Ras mobility in membranes 19
1.5.1 The Ras family 19
1.5.2 Mobility studies of membrane anchored proteins reveal membrane domains in cultured cells 20
1.6 Scope of this thesis 23

2 Dynamic partitioning of HRas **33**
2.1 Introduction 34
2.2 Materials and methods 35
2.2.1 Plasmids 35
2.2.2 Cell culture and transfection 35
2.2.3 Single-molecule fluorescence microscopy 36
2.2.4 Image analysis 36
2.2.5 Statistical analysis 37
2.2.6 Simulations 38
2.3 Results 39
2.3.1 YFP-Acrylamide gel 39

2.3.2 CAAX 40
2.3.3 HRas 42
2.3.4 Cholera toxin B treatment 45
2.3.5 Simulations results 46
2.4 Discussion 47
2.A Appendix 51
2.A.1 Estimation of radius of maximum clustering 51
2.A.2 Clustering models 52

3 Interferon receptor in living cells 57
3.1 Introduction 58
3.2 Materials and methods 59
3.2.1 Cell culture and transformation 59
3.2.2 Plasmid 60
3.2.3 A1-tag labeling 60
3.2.4 IFNα2 stimulation 60
3.2.5 Latrunculin A treatment 60
3.2.6 Single-Molecule Microscopy 61
3.2.7 Data analysis 61
3.3 Results 62
3.3.1 Mobility of Ifnar1 and Ifnar2 at stoichiometric concentration in presence and absence of stimulation . . 62
3.3.2 Effect of the actin cytoskeleton on receptor components mobility 64
3.3.3 Ifnar2 mobility in absence of Ifnar1 65
3.3.4 Ifnar1 mobility in absence of Ifnar2 67
3.4 Discussion 68

4 Microsecond single-molecule tracking 75
4.1 Introduction 76
4.2 Material and Methods 77
4.2.1 DNA Construct 77
4.2.2 Single-molecule microscopy 77
4.2.3 Fitting of single-molecule signals 78
4.2.4 Correction for chromatic aberration 79
4.2.5 Particle image cross-correlation spectroscopy 79
4.2.6 Error determination 82
4.2.7 FCS measurements 82
4.2.8 Viscosity measurements 82

4.3 Results 82
4.4 Conclusions 86
4.A Appendix 88
4.A.1 Derivation of theoretical result for the averaged MSD 88

5 Microsecond tracking in living cells 93
5.1 Introduction 94
5.2 Material and methods 95
5.2.1 Cell culture 95
5.2.2 Split-GFP complementation 95
5.2.3 Single-molecule microscopy 95
5.2.4 Correction for chromatic aberration 96
5.2.5 Data analysis 96
5.3 Results 97
5.3.1 System characterization 97
5.3.2 Microsecond mobility of GPI-anchor 98
5.4 Discussion 101
