**Title**: Imaging plasma membrane domains in signal-transduction pathways
**Issue Date**: 2012-03-13

# Imaging plasma membrane domains in signal-transduction pathways

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P. F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 13 Maart
klokke 11.15 uur

door

Anna Pezzarossa

geboren te Parma, Italië
in 1982

Promotiecommissie

|---|---|
| Promotor: | Prof. dr. T. Schmidt |
| Referent: | Prof. dr. J. Piehler (University of Osnabrück, Osnabrück, Germany) |
| Overige leden: | Dr. ir. E.J.G Peterman (Vrije Universiteit Amsterdam) |
| | Prof. dr. E.R. Eliel |
| | Prof. dr. M. Orrit |
| | Dr. ir. S.J.T van Noort |

Casimir PHd series, Delft-Leiden 2012-5
ISBN 978-90-8593-117-1

Het onderzoek beschreven in dit proefschrift is onderdeel van het wetenschappelijke programma van de Stichting voor Fundamenteel Onderzoek der Materie (FOM), die financieel wordt gesteund door de Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO).

# Contents

**1 Introduction** **1**
1.1 Membranes . . . . . 2
1.2 Diffusion and other means of cellular transport . . . . . 2
1.2.1 Fluorescent proteins for life cell imaging . . . . . 7
1.3 Single-molecule fluorescence microscopy . . . . . 10
1.3.1 Microsecond tracking . . . . . 12
1.4 Analysis of single-molecule data . . . . . 14
1.4.1 Tracking algorithm . . . . . 14
1.4.2 Particle image correlation spectroscopy . . . . . 16
1.4.3 Particle image cross-correlation spectroscopy . . . . 17
1.4.4 Fitting the Probability Distribution Function . . . . 18
1.5 Application: H-Ras mobility in membranes . . . . . 19
1.5.1 The Ras family . . . . . 19
1.5.2 Mobility studies of membrane anchored proteins reveal membrane domains in cultured cells . . . . . 20
1.6 Scope of this thesis . . . . . 23

**2 Dynamic partitioning of HRas** **33**
2.1 Introduction . . . . . 34
2.2 Materials and methods . . . . . 35
2.2.1 Plasmids . . . . . 35
2.2.2 Cell culture and transfection . . . . . 35
2.2.3 Single-molecule fluorescence microscopy . . . . . 36
2.2.4 Image analysis . . . . . 36
2.2.5 Statistical analysis . . . . . 37
2.2.6 Simulations . . . . . 38
2.3 Results . . . . . 39
2.3.1 YFP-Acrylamide gel . . . . . 39

2.3.2 CAAX . . . . . 40
2.3.3 HRas . . . . . 42
2.3.4 Cholera toxin B treatment . . . . . 45
2.3.5 Simulations results . . . . . 46
2.4 Discussion . . . . . 47
2.A Appendix . . . . . 51
2.A.1 Estimation of radius of maximum clustering . . . . . 51
2.A.2 Clustering models . . . . . 52

**3 Interferon receptor in living cells 57**
3.1 Introduction . . . . . 58
3.2 Materials and methods . . . . . 59
3.2.1 Cell culture and transformation . . . . . 59
3.2.2 Plasmid . . . . . 60
3.2.3 A1-tag labeling . . . . . 60
3.2.4 IFN$\alpha$2 stimulation . . . . . 60
3.2.5 Latrunculin A treatment . . . . . 60
3.2.6 Single-Molecule Microscopy . . . . . 61
3.2.7 Data analysis . . . . . 61
3.3 Results . . . . . 62
3.3.1 Mobility of Ifnar1 and Ifnar2 at stoichiometric concentration in presence and absence of stimulation . . 62
3.3.2 Effect of the actin cytoskeleton on receptor components mobility . . . . . 64
3.3.3 Ifnar2 mobility in absence of Ifnar1 . . . . . 65
3.3.4 Ifnar1 mobility in absence of Ifnar2 . . . . . 67
3.4 Discussion . . . . . 68

**4 Microsecond single-molecule tracking 75**
4.1 Introduction . . . . . 76
4.2 Material and Methods . . . . . 77
4.2.1 DNA Construct . . . . . 77
4.2.2 Single-molecule microscopy . . . . . 77
4.2.3 Fitting of single-molecule signals . . . . . 78
4.2.4 Correction for chromatic aberration . . . . . 79
4.2.5 Particle image cross-correlation spectroscopy . . . . 79
4.2.6 Error determination . . . . . 82
4.2.7 FCS measurements . . . . . 82
4.2.8 Viscosity measurements . . . . . 82

4.3 Results . . . . . 82
4.4 Conclusions . . . . . 86
4.A Appendix . . . . . 88
4.A.1 Derivation of theoretical result for the averaged MSD 88

**5 Microsecond tracking in living cells 93**
5.1 Introduction . . . . . 94
5.2 Material and methods . . . . . 95
5.2.1 Cell culture . . . . . 95
5.2.2 Split-GFP complementation . . . . . 95
5.2.3 Single-molecule microscopy . . . . . 95
5.2.4 Correction for chromatic aberration . . . . . 96
5.2.5 Data analysis . . . . . 96
5.3 Results . . . . . 97
5.3.1 System characterization . . . . . 97
5.3.2 Microsecond mobility of GPI-anchor . . . . . 98
5.4 Discussion . . . . . 101
