Molecular Mechanisms of Epithelial Host Defense in the Airways

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Dr.D.D.Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 11 januari 2007
klokke 13.45 uur

door

Joost Bastiaan Vos
geboren te Haarlem in 1977

PROMOTIECOMMISSIE

Promotores:	Prof. Dr. P.S.Hiemstra Prof. Dr. K.F. Rabe
Co-promotor:	Mw. Dr. N.A. Datson
Referent:	Prof. Dr. J-M Sallenave (Pasteur Instituut, Parijs, Frankrijk)
Overige leden:	Prof. Dr. J.Schalkwijk (Radboud Universiteit, Nijmegen) Dr. A.H. van Kampen (AMC, Amsterdam) Prof. Dr. A.C. Kroes Prof. Dr. F.J. Walther

The research described in this thesis was performed at the department of Pulmonology and the department of Medical Pharmacology of the Leiden University Medical Center, The Netherlands and was supported by a program grant from Netherlands Organization for Scientific Research (NWO; grant 902-11-092). Printing of this thesis was financially supported by (in alphabetical order): AstraZeneca B.V., Boehringer Ingelheim B.V., GlaxoSmithKline B.V., J.E. Jurriaanse Stichting, Numico Research B.V., Pfizer B.V., Stichting Longziekten Research.

Waar een wil is…

CONTENTS

Chapter 1	General introduction and scope of the thesis	9
Chapter 2	Exploring host-pathogen interactions at the epithelial surface: Application of transcriptomics in lung biology *Am J Physiol Lung Cell Mol Physiol, in press*	21
Chapter 3	The transcriptional response of bronchial epithelial cells to *Pseudomonas aeruginosa*: identification of early mediators of host defense *Physiol Genomics. 2005 May 11;21(3):324-36.*	47
Chapter 4	*Pseudomonas aeruginosa* rapidly induces a transient increase in expression of S100A8 and S100A9 in bronchial epithelial cells *Submitted for publication*	77
Chapter 5	Host defense effector molecules in mucosal secretions *FEMS Immunol Med Microbiol. 2005 Aug 1;45(2):151-8.*	93
Chapter 6	A molecular signature of epithelial host defense: comparative gene expression analysis of cultured bronchial epithelial cells and keratinocytes *BMC Genomics. 2006 Jan 18;7(1):9*	111
Chapter 7	Summary and General Discussion	131
Chapter 8	Nederlandse Samenvatting	145
