FROM FIND SCATTERS TO EARLY HOMINID BEHAVIOUR:

A STUDY OF MIDDLE PALAEO-LITHIC RIVERSIDE SETTLEMENTS
AT MAASTRICHT-BELVÉDÈRE (THE NETHERLANDS)

UNIVERSITY OF LEIDEN 1988

This paper originally appeared as a Ph. D. Thesis
Leiden University, 2 february 1989; with minor alterations.

© copyright 1989 by the Institute of Prehistory, Leiden

The investigations were supported in part by the Foundation for Archaeological Research, which is subsidized by the Netherlands Organization for Scientific Research (NWO). A NWO grant also supported the publication of this volume.

contents

1	Historical introduction and background	1
2	The geology of the Belvédère pit and its wider geographical setting	9
2.1	Introduction	9
2.2	The wider geological setting	9
2.3	The Middle and Late Pleistocene deposits at Maastricht-Belvédère	13
2.3.1	Introduction	13
2.3.2	Lithology and lithostratigraphy	13
2.3.3	Palaeosols	16
2.3.4	Climatic and palaeoenvironmental indicators	19
2.3.5	Dating evidence	20
2.3.6	Stratigraphical and palaeoenvironmental synthesis	22
3	Finds from Unit III	25
4	Finds and sites discovered in Unit IV-C-I	27
4.1	Introduction	27
4.2	Site C	27
4.2.1	Introduction	27
4.2.2	Stratigraphy	28
4.2.3	The finds	29
4.2.4	The refitting programme	40
4.2.5	Natural site-formation processes	59
4.2.6	Spatial analysis	61
4.2.7	Interpretation	64
4.3	Site G	65
4.3.1	Introduction	65
4.3.2	Stratigraphy	69
4.3.3	The finds	69
4.3.4	Interpretation	72
4.4	Site B	76
4.4.1	Introduction	76
4.4.2	Stratigraphy	76
4.4.3	The finds	78
4.4.4	Interpretation	78
5.	Finds and sites discovered in Unit IV-C-III	79
5.1	Introduction	79
5.2	Site F	79
5.2.1	Introduction	79
5.2.2	Stratigraphy	79
5.2.3	The finds	82
5.2.4	Natural site-formation processes	86

5.2.5	Interpretation	87
5.3	Site A	88
5.3.1	Introduction	88
5.3.2	Stratigraphy	88
5.3.3	The finds and their interpretation	89
5.4	Site D	91
5.5	Site K	91
6	The finds discovered in Unit V	97
6.1	Introduction	97
6.2	Site B	97
6.3	Other Unit V finds	97
6.4	Interpretation	98
7	Finds and sites discovered in Unit VI and a stray find of a 'Micoquian' handaxe	99
7.1	Introduction	99
7.2	Site J	99
7.2.1	Introduction	99
7.2.2	Research methods	99
7.2.3	Stratigraphy	100
7.2.4	Site J finds	102
7.2.5	Provisional interpretation of the lithic assemblage	103
7.2.6	Future research	105
7.3	Site E	106
7.3.1	Introduction	106
7.3.2	Stratigraphy	106
7.3.3	The finds	107
7.3.4	Horizontal and vertical distribution of the finds	108
7.3.5	The relation between the flint artefacts and the faunal material	108
7.3.6	Environment and climate during the formation of the Site E assemblage	111
7.3.7	The age of the Site E assemblage	112
7.4	A 'Micoquian' handaxe from the Belvédère pit	112
7.5	Interpretation of the Unit VI finds	115
8.	Palaeoenvironmental and dating evidence for the Unit IV-C sites: an evaluation	117
8.1	Introduction	117
8.2	Environment and climate during the formation of the Unit IV-C archaeological assemblages	117
8.2.1	The sedimentological evidence	117
8.2.2	The molluscan evidence	117
8.2.3	The vertebrate evidence	120
8.2.4	The palaeobotanical evidence	122
8.2.5	Discussion	122
8.3	Unit IV-C: the dating evidence	122
8.3.1	Relative dating evidence	122
8.3.2	Absolute dating evidence	129
8.3.3	Discussion	126
8.4	The chronological background: an evaluation	000
8.4.1	Introduction	127
8.4.2	Biostratigraphical subdivisions of the Dutch Quaternary	127
8.4.3	The oxygen isotope record	129

9	The Belvédère 'data': implications for the interpretation of hominid behaviour in the Middle Palaeolithic 133
9.1	Introduction 133
9.2	The Unit IV-C sites: an evaluation 133
9.3	Transport of lithic materials and Palaeolithic interassemblage variability 136
9.4	Hunters, scavengers and background faunas 139
9.5	The Unit IV-C sites in the northern European context 144
9.6	Early Middle Pleistocene sites and the pseudo-artefact problem 148

appendix I

A functional analysis of the Belvédère flints A. van Gijn 151

appendix II

Spatial analysis, a note P. van de Velde 159

appendix III

The identification of haematite as the colouring agent in red ochre from the Middle Palaeolithic Site C at Maastricht-Belvédère, The Netherlands, by means of x-ray diffraction analysis C.S. Arps 163

appendix IV

A note on Middle Palaeolithic surface sites in South Limburg W. Roebroeks 167
