THE WEAR AND TEAR OF FLINT

PRINCIPLES OF FUNCTIONAL ANALYSIS
APPLIED TO
DUTCH NEOLITHIC ASSEMBLAGES

UNIVERSITY OF LEIDEN 1989

editorial committee: L.P. Louwe Kooijmans / C.C. Bakels

edition of this volume: A.L. van Gijn / M. Wanders

drawings, lay-out and cover: H.A. de Lorm

copyright 1990 by the Institute of Prehistory Leiden

ISSN 0169-7447

ISBN 90-73368-02-2

Also appeared as doctorate thesis, Leiden, May 2, 1990.

Subscriptions to the series *Analecta Praehistorica Leidensia* and single volumes can be ordered exclusively at:

contents

1	Introduction	<i>1</i>
2	Methodology and techniques	<i>3</i>
2.1	Historical overview of the method	<i>3</i>
2.2	Aspects of damage	<i>3</i>
2.2.1	Edge-removals	<i>4</i>
2.2.2	Polish	<i>4</i>
2.2.2.1	Polish formation	<i>5</i>
2.2.2.2	Polish quantification	<i>6</i>
2.2.3	Striations	<i>7</i>
2.2.4	Edge-rounding	<i>8</i>
2.2.5	Residue	<i>8</i>
2.2.6	Relevant variables in wear-trace formation	<i>8</i>
2.3	Sampling	<i>9</i>
2.3.1	On the level of the assemblage	<i>9</i>
2.3.2	On the level of the artefact	<i>10</i>
2.4	Cleaning procedures	<i>11</i>
2.5	Microscopy and photography	<i>12</i>
2.6	Registration	<i>12</i>
2.6.1	Variables recorded per artefact: 'site-file'	<i>13</i>
2.6.2	Morphological description of the PUAs: 'macro-file'	<i>16</i>
2.6.3	Description of the wear-traces on the AUAs: 'micro-file'	<i>18</i>
2.7	Functional inferences: possibilities and limitations	<i>20</i>
2.7.1	Blind tests	<i>20</i>
2.7.2	Arriving at an interpretation of tool function	<i>21</i>
3	The experiments	<i>23</i>
3.1	Introduction	<i>23</i>
3.1.1	Ethnographic information and model-building	<i>23</i>
3.1.2	Experiments and their role in archaeological reasoning	<i>24</i>
3.1.3	Experimental procedures	<i>25</i>
3.1.4	Quantification of wear-attributes	<i>26</i>
3.2	Hide-working	<i>26</i>
3.2.1	Ethnographic accounts	<i>26</i>

3.2.2	Wear-traces from hide-working	28
3.3	Wood-working	30
3.3.1	Ethnographic accounts	30
3.3.2	Wear-traces from wood-working	30
3.4	Bone- and antler-working	32
3.4.1	Ethnographic accounts	32
3.4.2	Wear-traces from bone- and antler-working	32
3.4.2.1	Bone	32
3.4.2.2	Antler	33
3.5	Plant-working	36
3.5.1	Ethnographic accounts	36
3.5.1.1	Wild plant gathering	36
3.5.1.2	Cereal-harvesting	36
3.5.2	Wear-traces	40
3.5.2.1	Wear-traces from cutting wild plants	40
3.5.2.2	Wear-traces from reaping domesticated cereals	40
3.6	Butchering and meat-cutting	41
3.6.1	Ethnographic accounts	41
3.6.2	Wear-traces from butchering and meat-cutting	43
3.7	Fish	44
3.7.1	Ethnographic accounts	44
3.7.2	Wear-traces from fish	44
3.8	Projectiles	44
3.8.1	Ethnographic accounts	44
3.8.2	Wear-traces from the use of projectiles	45
3.9	Pottery	46
3.9.1	Ethnographic accounts	46
3.9.2	Wear-traces from pottery	47
3.10	Stone, shell and teeth	47
3.10.1	Ethnographic accounts	47
3.10.2	Wear-traces from stone, shell and teeth	47
3.11	Soil	48
3.11.1	Ethnographic accounts	48
3.11.2	Wear-traces from soil	48
3.12	Counting experimental wear-attributes	48
4	Post-depositional surface modifications	51
4.1	Introduction	51
4.2	Post-depositional surface modifications: a wide range of phenomena	51
4.2.1	Introduction	51
4.2.2	Chemical alterations	51

4.2.2.1	White or bluish patina	51
4.2.2.2	Colour patina	52
4.2.2.3	Gloss patina and other sheens	53
4.2.2.4	Friction gloss	53
4.2.3	Mechanical alterations	53
4.2.3.1	Trampling	53
4.2.3.2	Post-excavation damage	54
4.2.4	Discussion	54
4.3	Inventory of occurrences of pdsm in archaeological assemblages	55
4.4	Conclusion	55
5	The Linearbandkeramik site of Beek-Molensteeg	59
5.1	Introduction	59
5.1.1	Site location and excavation history	59
5.1.2	Objectives	63
5.1.3	Methods and sampling procedure	63
5.2	The flint technology	63
5.2.1	Introduction	63
5.2.2	The acquisition of raw material	64
5.2.3	Core preparation and primary trimming	65
5.2.4	Further reduction and shaping	66
5.2.5	Maintenance and modification	69
5.3	Tool typology	69
5.3.1	Introduction	69
5.3.2	Tool types present	70
5.4	The functional analysis	73
5.4.1	Sampling and methods	73
5.4.2	Activities inferred	75
5.4.2.1	Hide-working	75
5.4.2.2	Wood-working	79
5.4.2.3	Wood-/ bone-/ antler-working	79
5.4.2.4	Processing of soft plants excluding cereals	81
5.4.2.5	Reaping of cereals	81
5.4.2.6	Cutting meat	85
5.4.2.7	Polish '23': an unresolved transverse motion	85
5.4.2.8	The use of projectile-points	86
5.4.2.9	Working hard and soft material	86
5.4.2.10	Working unknown material	86
5.4.2.11	Hafting	86
5.4.3	Spatial distribution	86
5.5	Aspects of tool form and function	89
5.5.1	Edge angle	89
5.5.2	Shape of the edge	89
5.5.3	Shape of the aspect surfaces	90
5.5.4	Form of the cross-section	92
5.5.5	Tool type	92

5.5.6	Raw material	92
5.5.7	Discussion	92
5.6	Conclusion	93
6	The Late Neolithic Vlaardingen sites	97
6.1	The Vlaardingen-group	97
6.1.1	General introduction	97
6.1.2	Subsistence economy	97
6.1.3	Objectives	99
6.2	Hekelingen III	99
6.2.1	Introduction and research goals	99
6.2.2	The flint technology	103
6.2.3	The functional analysis	104
6.2.3.1	Methods used and composition of the sample	104
6.2.3.2	Activities inferred	106
	Bone-working	108
	Soft plant-working	109
	Hide-working	112
	Wood-working	115
	Wood-/ bone-/ antler-working	115
	Antler-working	115
	Stone- and shell-working	115
	The use of projectile-points	115
	Working hard and soft material	115
	Working unknown material	115
	Hafting	115
	Noteworthy 'absentees'	119
6.2.4	Intra- and inter-unit variability	120
6.2.5	Aspects of form and function	123
6.2.5.1	Edge angle	124
6.2.5.2	Shape of the edge	124
6.2.5.3	Shape of the aspect surfaces	126
6.2.5.4	Tool type	126
6.2.5.5	Discussion	127
6.2.6	Duration of occupancy at Hekelingen III	128
6.2.6.1	Evidence from the use-wear analysis	129
6.2.6.2	Alternative evidence	130
6.2.7	Conclusion	131
6.3	Leidschendam trench 4	133
6.3.1	Introduction	133
6.3.2	The flint assemblage	134
6.3.3	The functional analysis	135
6.3.3.1	Sampling and methods	135
6.3.3.2	Activities inferred	137
6.3.4	Aspects of form and function	137
6.3.5	Interpretation of the Leidschendam trench 4 assemblage	138
6.4	Site differentiation within the Vlaardingen-group	139

7	The interpretative possibilities of microwear analysis	143
7.1	Introduction	143
7.2	Form versus function	143
7.3	Reconstruction of activities and tasks	144
7.4	The search for activity loci	145
7.5	Tracing functional differentiation between sites	146
7.6	The future of microwear analysis	147
	references	149
	appendix I Coding list	163
	appendix II Tables of experiments performed	168
	samenvatting (Dutch summary)	175
	list of abbreviations	179
	list of symbols	179
