Contents

1	Introduction	<i>1</i>
2	Topography, soil and geology	<i>5</i>
2.1	Location	<i>5</i>
2.2	Geology and soil	<i>5</i>
2.3	Local geological situation	<i>7</i>
3	Research methods	<i>11</i>
3.1	Introduction	<i>11</i>
3.2	Measuring system and borings	<i>11</i>
3.3	Research of April 1990	<i>12</i>
3.4	Excavation of July-September 1990	<i>13</i>
3.5	Research of April 1991	<i>15</i>
3.6	Processing of finds	<i>15</i>
4	The finds	<i>17</i>
4.1	Introduction	<i>17</i>
4.2	Raw materials	<i>17</i>
4.2.1	Introduction	<i>17</i>
4.2.2	Description of the types of flint	<i>17</i>
4.2.3	Provenance of the flint	<i>20</i>
4.2.4	Division of types into RMUs	<i>22</i>
4.3	Refitting	<i>23</i>
4.4	Description of the finds	<i>26</i>
4.4.1	Introduction	<i>26</i>
4.4.2	Cores	<i>31</i>

4.4.3	Core fragments	36
4.4.4	Flakes	36
4.4.5	Crested blades	37
4.4.6	Blades	38
4.5	Tools	42
4.5.1	Introduction	42
4.5.2	Scrapers	42
4.5.3	Composite tools	46
4.5.4	Borers and becs	46
4.5.5	Burins	46
4.5.6	Other tools	51
4.6	Description of RMUs	52
4.6.1	Introduction	52
4.6.2	Simpelveld flint	52
4.6.3	Valkenburg flint	68
4.6.4	South-Limburg flint	69
4.6.5	Orsbach flint	93
4.7	Unworked stone	98
4.8	Conclusions technology	99
4.8.1	Introduction	99
4.8.2	Selection and characteristics of lithic raw materials	100
4.8.3	Variations in flint working	101
4.8.4	Intentions of the flint knappers and productivity of cores	105
4.8.5	Selection of blades for use as tool	109
4.8.6	Discard of cores	110

5 Lithic functional analysis (Katsuhiko Sano) 113

5.1	Samples and methods	113
5.2	Results	114
5.2.1	Blades	114
5.2.2	Flakes	116
5.2.3	Burins	119
5.2.4	End scrapers	123
5.3	Discussion and conclusion	123

6 Spatial distribution of finds 127

6.1	Introduction	127
6.2	Horizontal distribution	129
6.2.1	Introduction	129
6.2.2	Artefacts from the plough zone	129
6.2.3	Artefacts plotted in three dimensions	131

6.2.4	Unworked stone from the plough zone	133
6.2.5	Unworked stone plotted in three dimensions	133
6.2.6	Ochre? (Bertil van Os)	135
6.3	Vertical distribution	136
6.4	Post-depositional processes	139
6.4.1	Introduction	139
6.4.2	Slope processes	140
6.4.3	Chemical weathering	145
6.4.4	Frost and drought processes	145
6.4.5	Biotic processes	146
6.4.6	Anthropogenic processes	151
6.4.7	Discussion	154
6.5	Characteristics of clusters	154
6.5.1	Introduction	154
6.5.2	Cluster A and its periphery	154
6.5.3	Cluster B	156
6.5.4	Cluster C	156
6.5.5	Cluster D	158
6.6	Distribution of RMUs	159
6.6.1	Introduction	159
6.6.2	Simpelveld flint	159
6.6.3	Valkenburg flint	167
6.6.4	South-Limburg flint	167
6.6.5	Orsbach flint	185
6.6.6	Conclusions distribution RMUs	186
6.7	Tools	188
6.8	Clusters A and B: interpretation	195
6.8.1	Introduction	195
6.8.2	A central hearth or not?	195
6.8.3	Binford's hearth seating model	197
6.8.4	Stapert's ring and sector method	198
6.8.5	Evaluation	201
6.9	Discussion	203
7	Regional context: Magdalenian sites in the Meuse-Rhine loess area	207
7.1	Introduction	207
7.2	Geology and landscape	207
7.3	Presentation of the sites	208
7.4	Position in the landscape (site location)	212

7.5	Conservation and erosion	213
7.6	Raw materials and technology	215
7.6.1	Introduction	215
7.6.2	Sites in the area with Cretaceous flint sources	217
7.6.3	Sites outside the area with Cretaceous flint sources	221
7.7	Characteristics and composition of tools	222
7.8	Site size and settlement features	225
7.9	Discussion	228
8	Northwest European context	233
8.1	Introduction	233
8.2	Meuse-Rhine loess area: non-local raw materials	234
8.3	Central Rhineland	239
8.4	Interpretation of raw material data	244
8.5	Relationship with cave sites in the Ardennes Massif?	246
8.6	Discussion	249
8.7	Conclusion	251
9	General conclusion	253
	References	257
	Summary	267
	Samenvatting	271
	Acknowledgements	275
	Picture credits	277
