Cell-autonomous and host-dependent CXCR4 signaling in cancer metastasis

Insights from a zebrafish xenograft model

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 14 juni 2016
klokke 13:45 uur

Table of contents

Chapter 1	Introduction and thesis outline	9
Chapter 2	Imaging cancer angiogenesis and metastasis in a zebrafish embryo model	21
Chapter 3	Imaging of human cancer cell proliferation, invasion and micrometastasis in a zebrafish xenogeneic engraftment model	51
Chapter 4	Inhibition of signaling between human CXCR4 and zebrafish ligands by the small molecule IT1t impairs the formation of triple-negative breast cancer early metastases in a zebrafish xenograft model	69
Chapter 5	CXCR4 signaling in the tumor microenvironment orchestrates experimental metastasis formation by controlling myeloid cell motility and response to malignant cells	103
Chapter 6	P53 stabilization by MDMX interference and CXCR4 receptor inhibition: a potential new strategy to attenuate Ewing sarcoma early metastatic events	139
Chapter 7	Summary and discussion	161
Chapter 8	Dutch summary (Nederlandstalige samenvatting)	171
	<i>Curriculum vitae</i>	177
	Publication list	179
