in 1987

Promotiecommissie:

Promotores: prof.dr. K.P. Goudswaard  
prof.dr. C.L.J. Caminada  
Co-promotor: dr. M.G. Knoef

Overige leden: prof.dr. R.J.M. Alessie (Rijksuniversiteit Groningen)  
prof.mr. G.J.J. Heerma van Voss  
prof.dr. M. Lindeboom (Vrije Universiteit Amsterdam)  
prof.dr. P. Nieuwbeerta

*In my beginning is my end. In my end is my beginning.*  
T.S. Eliot, "East Coker," Four Quartets

# Preface

Finishing the Ph.D. thesis allows me to thank the people who have contributed, directly or indirectly, to the thesis. I would like to thank the the Department of Economics at Leiden University for providing me an enjoyable, yet stimulating environment. Foremost, I would like to thank my promotors, Kees Goudswaard and Koen Caminada, for letting me find my way in the economics science profession. A special thanks goes to my colleague, copromotor, coauthor, principal investigator of our research project and officemate Marike Knoef.

I am grateful to Rob Alessie, Guus Heerma van Voss, Maarten Lindeboom and Paul Nieuwbeerta for taking place in my Ph.D. committee and for providing me with valuable comments to this thesis.

Other people who have largely shaped my interests for the economics profession are, in alphabetical order, Sjef Ederveen, Henri de Groot, Michael Hurd, Susann Rohwedder, Olaf van Vliet and Daniel van Vuuren. Olaf, I am thankful for having you as a *paranimph*.

I thank Hendri Adriaens for his help with the  $\LaTeX$  code for this thesis.

Many thanks also go to the numerous conference participants and my friends, both in and out the economics profession. A special thanks goes out to Erik, Cary, Lyte, Vijay, Sijmen and Shadi. Shadi, I am happy with you as a *paranimph*.

Finally, my gratitude goes out to my family at large. I thank my parents, Paul and Sandra, for all their love and help, but especially for showing me that we should do what we like best. My final words go to the persons who are unfortunately unable to experience this memorable

moment. There is no proper way of thanking you for all you have meant to me, but let me try it anyway: *Lieve opa en oma, dit boek is voor jullie.*

Jim Been, Leiden, January 2015

# Contents

<b>Preface</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Motivation . . . . .	1
1.2 Research questions . . . . .	2
1.3 Main findings . . . . .	9
<b>2 Pension reform and income inequality among the elderly in 15 European countries</b>	<b>15</b>
2.1 Introduction . . . . .	16
2.2 Pension reforms . . . . .	17
2.2.1 Public and private pensions . . . . .	17
2.2.2 Earlier findings . . . . .	19
2.3 Data, measures and method . . . . .	20
2.3.1 Public and private pension expenditure . . . . .	20
2.3.2 Income inequality and poverty among the elderly . .	22
2.3.3 Method . . . . .	23
2.4 Empirical analysis . . . . .	24
2.4.1 Descriptive statistics . . . . .	24
2.4.2 Regression results . . . . .	27
2.4.3 Sensitivity analyses . . . . .	32
2.5 Discussion . . . . .	34
2.6 Conclusion . . . . .	35
2.A Sensitivity analyses . . . . .	36
<b>3 Measuring Retirement Savings Adequacy; Developing a multi-pillar approach in the Netherlands</b>	<b>49</b>
3.1 Adequate retirement savings . . . . .	50
3.2 The Dutch Pension System . . . . .	55
3.3 Data . . . . .	57
3.4 Descriptive analysis . . . . .	59

3.4.1	Income . . . . .	59
3.4.2	Wealth . . . . .	61
3.5	Method and assumptions . . . . .	63
3.5.1	Annuitizing household wealth . . . . .	63
3.5.2	Assumptions . . . . .	65
3.6	Results . . . . .	68
3.6.1	Future retirement income . . . . .	68
3.6.2	Gross replacement rates . . . . .	69
3.6.3	Net replacement rates . . . . .	75
3.6.4	Poverty . . . . .	77
3.7	Vulnerable groups . . . . .	79
3.8	Scenario analyses . . . . .	81
3.8.1	Optimistic and pessimistic scenarios . . . . .	81
3.8.2	Depletion of housing wealth . . . . .	86
3.9	Summary and conclusions . . . . .	87
3.A	Taxes . . . . .	90
<b>4</b>	<b>Estimating a panel data sample selection model with part-time employment: Selection issues in wages over the life-cycle</b>	<b>93</b>
4.1	Introduction . . . . .	94
4.2	Data . . . . .	98
4.2.1	Variable definitions and data selection . . . . .	99
4.2.2	Descriptive statistics . . . . .	100
4.3	Model . . . . .	110
4.3.1	Panel data sample selection model . . . . .	110
4.3.2	Panel data sample selection model with part-time employment . . . . .	113
4.3.3	Experience and unemployment . . . . .	116
4.3.4	Estimation . . . . .	116
4.4	Estimation results . . . . .	118
4.4.1	Selection equation . . . . .	118
4.4.2	Wage equation . . . . .	118
4.4.3	Education-specific selection in full-time and part-time employment . . . . .	123
4.4.4	Education-specific part-time wage penalties . . . . .	124
4.4.5	Sensitivity analyses . . . . .	129
4.5	Conclusion . . . . .	130
4.A	Derivation of the selection terms . . . . .	134
4.B	First-stage regression results . . . . .	138
<b>5</b>	<b>Early retirement across Europe. Does non-standard employment increase participation of older workers?</b>	<b>143</b>
5.1	Introduction . . . . .	144

---

5.2	Model . . . . .	146
5.2.1	Literature review . . . . .	146
5.2.2	Theoretical framework to model retirement decisions	148
5.2.3	Empirical model . . . . .	150
5.2.4	Finding the appropriate estimator . . . . .	152
5.2.5	Instruments . . . . .	153
5.3	Data and definitions . . . . .	157
5.3.1	Data . . . . .	157
5.3.2	Descriptive statistics . . . . .	160
5.4	Results from reduced form retirement model . . . . .	163
5.5	Sensitivity of the dependent variable . . . . .	173
5.5.1	Employment rates . . . . .	173
5.5.2	Age-windows . . . . .	174
5.5.3	Hours decisions . . . . .	175
5.6	Summary and discussion . . . . .	181
5.A	Descriptive statistics . . . . .	183
<b>6</b>	<b>The necessity of self-employment towards retirement: Evidence from labor market dynamics and search requirements for unemployment benefits</b>	<b>185</b>
6.1	Introduction . . . . .	186
6.2	Unemployment insurance towards retirement . . . . .	189
6.3	Model . . . . .	192
6.3.1	Exit routes to retirement . . . . .	192
6.3.2	Identifying the effects of job search requirements . . . . .	195
6.3.3	Estimation . . . . .	197
6.4	Data . . . . .	198
6.4.1	Data and definitions . . . . .	198
6.4.2	Descriptive analysis . . . . .	199
6.5	Results . . . . .	205
6.5.1	Estimation results . . . . .	205
6.5.2	Robustness checks . . . . .	208
6.5.3	Simulation . . . . .	215
6.6	Discussion . . . . .	217
6.7	Conclusion . . . . .	218
	<b>Bibliography</b>	<b>221</b>
	<b>Nederlandse samenvatting</b>	<b>249</b>
	<b>Curriculum Vitae</b>	<b>257</b>

# List of Tables

2.1	Pension expenditures in European countries, 1995-2007 . . .	26
2.2	Trends in social outcomes among elderly people, 1995-2007	28
2.3	Panel data regressions of pension expenditures and income inequality (s80/s20) among the elderly (65+) . . . . .	30
2.4	Panel data regressions of pension expenditures and poverty (PL 60) among the elderly (65+) . . . . .	31
2.5	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>excluding graying</b> . . . .	38
2.6	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>including GDP per capita</b>	39
2.7	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>with linearly inter- and extrapolated dependent and independent variables</b> . . . .	40
2.8	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>with linearly inter- and extrapolated independent variables</b> . . . . .	41
2.9	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>with linearly interpolated independent variables</b> . . . . .	42
2.10	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>with cubically interpolated independent variables</b> . . . . .	43
2.11	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>with cubically spline interpolated independent variables</b> . . . . .	44
2.12	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>excluding Scandinavian countries</b> . . . . .	45
2.13	Panel data regressions of pension expenditures and <b>different poverty lines (PL 50, PL 70)</b> among the elderly (65+) . .	46

2.14	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>using income distribution variables of OECD (2010) instead of Eurostat (2011)</b> . . . . .	47
2.15	Panel data regressions of pension expenditures and social outcomes among the elderly (65+) <b>using a decomposition of private pension expenditures into mandatory and voluntary expenditures</b> . . . . .	48
3.1	Household income, 2008 . . . . .	60
3.2	Household wealth, 2008 . . . . .	62
3.3	Predicted yearly retirement income (annuitized wealth) . . . . .	70
3.4	Gross replacement rates, 2008 . . . . .	72
3.5	Share of households below 70% and 100% gross replacement rates, 2008 . . . . .	73
3.6	Net replacement rates, 2008 . . . . .	76
3.7	Share of households below 80% and 100% net replacement rates, 2008 . . . . .	77
3.8	Median pension annuity (PA) and gross replacement rates (GRR) of potentially vulnerable groups, 2008 . . . . .	82
3.9	Assumptions in the pessimistic, baseline and optimistic scenario . . . . .	84
3.10	Median pension annuities in the pessimistic- and optimistic scenarios . . . . .	85
3.11	Gross replacement rates in the pessimistic- and optimistic scenarios . . . . .	86
3.12	Median pension annuities and gross replacement rates when housing wealth will be depleted . . . . .	87
3.13	Median tax pressure over income deciles for four types of 65+ households, 2008 . . . . .	91
4.1	Descriptives of real earnings and wage rates . . . . .	101
4.2	Effect of career breaks (years) on wage . . . . .	122
4.3	Part-time wage penalty for the mean for educational levels . . . . .	129
4.4	Estimation results first-stage selection equation, men . . . . .	140
4.5	Estimation results first-stage selection equation, women . . . . .	141
5.1	Activity rates of workers aged 25-54 and 55-64 . . . . .	162
5.2	Labor market withdrawal of workers aged 55-64 relative to workers aged 25-54 . . . . .	164
5.3	Regression results of labor market withdrawal, men 55-64 . . . . .	171
5.4	Regression results of labor market withdrawal, women 55-64 . . . . .	172
5.5	Retirement indicator based on employment rates . . . . .	174
5.6	Sensitivity of the results to decreases in the age-window of the dependent variable, men . . . . .	176

---

5.7	Sensitivity of the results to decreases in the age-window of the dependent variable, women . . . . .	177
5.8	Average number of hours worked, 55-64 . . . . .	179
5.9	Labor supply effects at the intensive margin, 55-64 . . . . .	180
5.10	Dependent and independent variables (raw data) . . . . .	183
5.11	Pairwise correlation coefficients of endogenous variables and instruments . . . . .	184
6.1	Descriptive statistics . . . . .	201
6.2	Average year-to-year transitions, men . . . . .	203
6.3	Average year-to-year transitions, women . . . . .	204
6.4	Estimation results baseline model (men) . . . . .	209
6.5	Estimation results baseline model (women) . . . . .	210
6.6	Main income source and income level for those moving from inactivity to self-employment . . . . .	211
6.7	Estimation results extended models . . . . .	212
6.8	Robustness checks . . . . .	214
6.9	Simulation results . . . . .	217

# List of Figures

3.1	Composition of pension annuities over the income distribution	71
3.2	Replacement rates over the income distribution . . . . .	74
4.1	Life-cycle earnings of men (a) and women (b) . . . . .	103
4.2	Percentage of men in full-time employment (a) and part-time employment (b) . . . . .	104
4.3	Percentage of women in full-time employment (a) and part-time employment (b) . . . . .	106
4.4	Life-cycle wages of men (a) and women (b) . . . . .	107
4.5	Full-time and part-time wages of men . . . . .	108
4.6	Full-time and part-time wages of women . . . . .	109
4.7	Binary versus ordered selection correction regressions and regressions without selection correction of men (a) and women (b) . . . . .	120
4.8	Part-time and full-time wage regressions for (a) low-educated and (b) high-educated men . . . . .	125
4.9	Part-time and full-time wage regressions for (a) low-educated and (b) high-educated women . . . . .	126
4.10	Ordered selection correction regressions with $J=7$ for men (a) and women (b) . . . . .	131
5.1	Disability-, unemployment-, self-employment- and part-time employment rates of persons aged 55-64 over time. . .	165
