Acknowledgements	VII
Summary	IX
Nederlandse Samenvatting	XI
Propositions	XV
Introduction	1
1. Materials for Writing	7
1.1 The Writing Surface	7
1.2 Identification of Colourants	17
Black	18
Red	20
Yellow	22
Blue	26
Other colours	29
1.3 Covers	30
1.4 Adhesives	34
Discussion and Conclusions	36
2. The Practice of Codex Making	39
2.1 Making the Support	39
2.2 Making Paint	46
2.3 The Process of Writing	52
2.4 Covers	57
2.5 Tools	64
Discussion and Conclusions	65
3. The Lifecycle of the Mesoamerican Codices	67
3.1 Context of Using a Religious Codex	67
3.2 Using a Historical Codex	72
3.3 Secondary Uses and Non-use	78
3.4 Decay of Books	81
3.5 Disposal or Reinvigoration	85
Discussion and Conclusions	87

4,	Demons and Colonization, the Destruction of Written Culture	89
4.1	Christian Perception of Evil and the Other	89
4.2	The Internal Demon	95
4.3	The Effect of the European Middle Ages on the Mesoamerican Codices	98
	Discussion and Conclusions	107
5.	Reproduction of the Codices	109
5.1	Antiquities of Mexico	110
5.2	The Age of Photography	117
5.3	Digital Reproduction	122
5.4	Re-producing Codices	125
	Discussion and Conclusions	131
6.	Recovery of a Hidden Chapter in the Life of Codex Añute	133
6.1	Description of the Codex	133
6.2	The Investigation of the Añute Palimpsest in the 1950's	135
6.3	The Techniques of the 2012-2016 Science4Arts Investigation	139
6.4	The Visible Areas	145
6.5	Hyperspectral Results Revealing Sub-surface Images	156
	Discussion and Conclusions	162
7.	Conclusions and Reflections	165
	References	171
	Appendix A	185
	Appendix B	197
	Appendix C	207
	List of Figures	211
	List of Tables	214
	Curriculum Vitae of the Author	215

Acknowledgements

Although only my name appears on the cover of this work, it would have been impossible to do this research, let alone write this final result without the help, support, and collaboration of many individuals and institutes. First and foremost I wish to express my gratitude to the Netherlands Organisation for Scientific Research (NWO) for funding the project “Shedding light on endangered mutual heritage. Developing non-invasive imaging techniques to uncover, understand and preserve ancient Mexican pictorial manuscripts” within their Science4Arts program, which allowed me to do my PhD research. I would also like to thank Maarten Jansen, David Howell, Annelou van Gijn, Joris Dik, Andreas Schmidt-Ott and Peter Mason for all their valuable contributions during the whole run of the project and as committee members. I also wish to thank Tim Zaman and Art Ness Proaño Gaibor for a very pleasant collaboration and knowledge exchange during the different stages of this research. This research could not have taken place without the trust and collaboration of the staff at the Bodleian Library. I wish to mention here in particular Bruce Barker-Benfield and Virginia Lladó-Buisán for their kindness and support. I would like to acknowledge also the important input to this project from collaboration with other research projects. First of all I would like to thank Antonio Sgamellotti, Davide Domenici and the rest of the MOLAB team for the inspiring collaboration and the sharing of research results. I would also like to thank all my colleagues in the Mesoamerican research group, both those in the ERC project “Time in Intercultural Context” and those from other projects, for the lively discussions and the exchange of ideas. Besides the scholarly support of colleagues, the personal support of family and friends deserves a clear acknowledgement. My parents, sister, grandparents, uncle, aunts and all other family members have always supported me in my choice of a career in archaeology. Another person that deserves mention here is Kevin van Ingen, who

has not only been a great friend for over twenty years, but has also been a keen sparring partner for the discussion of new scientific ideas. Last but certainly not least, I wish to thank Ismay de Ridder for putting up with me every day, no matter how stressed I was, and helping me in more ways than I can here recount.
