A Markov approach to characterising the PK-PD relationship of anti-migraine drugs
Hugo J. Maas
Ph.D. Thesis, Leiden University, June 2007

A Markov approach to characterising the PK-PD relationship of anti-migraine drugs

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 5 juni 2007
klokke 13:45 uur

door

Hugo Maas

geboren te Roermond
in 1977

Promotor : Prof. dr. M. Danhof

Co-promotor : Dr. O.E. Della Pasqua

Referent : Prof. L. Aarons (University of Manchester)

Overige Leden : Prof. dr. E.R. de Kloet
Prof. dr. J.M.A. van Gerven
Prof. dr. A.P. IJzerman
Dr. F.M. Spieksma

Contents

1	General introduction: analysis of the treatment response of anti-migraine drugs in clinical trials	9
1.1	Summary and outline	9
1.2	The burden of migraine	10
1.2.1	Patient viewpoint	10
1.2.2	Epidemiological viewpoint	14
1.3	Anti-migraine therapy	17
1.3.1	Acute therapy	17
1.3.2	Prophylaxis	20
1.4	Clinical trials of acute anti-migraine drugs	21
1.4.1	Clinical endpoints	21
1.4.2	Timing of treatment	23
1.4.3	Patient demographics	23
1.4.4	Placebo response	24
1.5	Analysis of data from trials of acute anti-migraine drugs	25
1.5.1	Change from baseline	25
1.5.2	Time-to-event analysis	26
1.5.3	Proportional odds models	26
1.5.4	Multistate Models	27
2	Scope and intent of investigation	35
2.1	Scope	35
2.2	Intent of investigation	37
3	Prediction of headache response after migraine treatment using a Markov model	41
3.1	Introduction	42
3.2	Methods	43
3.2.1	Efficacy data	43
3.2.2	Pharmacokinetic data	43
3.2.3	Markov model	43
3.3	Results	45
3.4	Discussion	46

4	A model-based approach to treatment comparison in acute migraine.	53
4.1	Introduction	54
4.2	Methods	55
4.2.1	Migraine attack model	55
4.2.2	Covariates	56
4.2.3	Data	57
4.2.4	Pharmacokinetic analysis	57
4.2.5	Disease Modelling	58
4.2.6	Model evaluation and prediction	58
4.2.7	Software	58
4.3	Results	60
4.4	Discussion	63
5	The relevance of absorption rate and lag time to the onset of action and pain relief in migraine	71
5.1	Introduction	72
5.2	Materials and Methods	72
5.2.1	Pharmacokinetic model	72
5.2.2	Response model	74
5.2.3	Model fitting	75
5.2.4	Evaluation of model performance	75
5.3	Results	75
5.3.1	Absorption rate	75
5.3.2	Lag time	77
5.4	Discussion	77
6	Model-based quantification of the relationship between age and anti-migraine therapy	85
6.1	Introduction	86
6.2	Methods	87
6.2.1	Markov model	87
6.2.2	Age and treatment effects	88
6.2.3	Data	89
6.2.4	Pharmacokinetic analysis	89
6.2.5	Disease Modelling	91
6.2.6	Software	91
6.3	Results	91
6.4	Discussion	91
7	Prediction of attack frequency in migraine: a Markov approach	97
7.1	Introduction	98
7.2	Methods	99
7.2.1	Data	99

7.2.2	Distribution analysis	99
7.2.3	Stochastic process	100
7.2.4	Goodness-of-fit statistics	101
7.3	Results	102
7.4	Discussion	107
8	Modelling of the PK-PD relationship of anti-migraine drugs using a Markov approach:	
	Summary, conclusions and perspectives	111
8.1	Developing a disease-state approach to modelling	112
8.2	Development of diagnostic tools	114
8.3	Model consistency across drugs	114
8.4	The effect of covariates on the anti-migraine response	115
8.5	The episodic nature of migraine	116
8.6	Perspectives	117
8.7	Extensions to the techniques	118
A	Appendix:	
	Analysis of responses in migraine modelling using hidden Markov models	121
A.1	Introduction	122
A.2	Methods	125
A.2.1	Model	125
A.2.2	Predictions	128
A.2.3	Mean responses	128
A.2.4	Confidence intervals	130
A.2.5	Performance of the algorithm	132
A.3	Results	132
A.4	Discussion	134
B	Appendix:	
	Parameter estimation in hidden Markov modelling of migraine	141
B.1	Model specifications	141
B.2	The Baum-Welch algorithm	143
B.3	Model implementation: user-written routines	144
	Samenvatting	157
	Nawoord	165
	Curriculum Vitae	167
	List of publications	169
