Title: Muscle and joint sequelae in brachial plexus injury

Issue Date: 2016-08-31

The background of the cover is a fluorescence microscopy image of muscle cells. The cells are stained with a green fluorescent marker, likely highlighting the cytoplasm or myofibrils, and a blue fluorescent marker, likely highlighting the nuclei. The cells are elongated and spindle-shaped, with some showing multiple nuclei. The overall appearance is that of a muscle tissue sample under a fluorescence microscope.
