Curriculum vitae

LIST OF ABBREVIATIONS

ANOVA	analysis of variance
AP	angina pectoris
Apo (AI, B, B48, B100)	apolipoprotein
ASP	acylation stimulating protein
ATRLs	artificial TRLs
au	arbitrary units
BMI	body mass index
C3	complement component 3
CAD	coronary artery disease
CCA	common carotid artery
CD11b/ CD66b	cluster of differentiation (designation)
CR1	complement Receptor 1
CRP	C-reactive protein
CVD	cardiovascular disease
(d)AUC	(incremental) area under the curve
DNA	deoxyribonucleic acid
DMTU	dimethylthiourea
ECD	PE-Texas Red
FACS	fluorescence-activated cell sorter
FCH	familial combined hyperlipidemia
FFA	free fatty acid
FH	familial hypercholesterolemia
FITC	fluorescein isothiocyanate
fMLP	N-formylmethionyl-leucyl-phenylalanine
GC	gas chromatography
GPIHBP1	glycosylphosphatidylinositol- anchored high-density lipoprotein-binding protein 1
HBA	hydroxybutyric acid
HDL	high density lipoproteins
HOMA	homeostatic model assessment
IC	immune complexes
IMT	intima-media thickness
LDL	low density lipoproteins
LDL-R	LDL-receptor
LPL	lipoprotein lipase
MASPs	MBL-associated serine proteases
MBL	mannose binding lectin

MFI	mean fluorescence intensity
MoAbs	monoclonal antibodies
MOD	minimum obstruction diameter
MPO	myeloperoxidase
mRNA	messenger Ribonucleic Acid
MSD	mean segment diameter
MSR1	macrophage scavenger receptor 1
NKX2-3	NK2 transcription factor related
NTRLs	native TRLs
OFLT	oral fat loading test
OGTT	oral glucose tolerance test
OR	odds ratio
PCR	polymerase chain reaction
PE	phycoerythrin
REGRESS	Regression Growth Evaluation Statin Study
ROS	reactive oxygen species
Sf	Svedberg flotation rate
SNP	single-nucleotide polymorphism
T2DM	type 2 diabetes mellitus
TG	triglycerides
TRLs	TG-rich lipoproteins
VLDL	very low density lipoproteins

Book Chapter:

Alipour A, Coll B, Rietveld AP, Marsillac J, Camps J, Joven J, Elte JWF, Castro Cabezas M. Paraxonase 1 and postprandial lipemia. In: Mackness B, Mackness M, Aviram M, Paragh G. Proteins and cell regulation, Volume 6: The Paraxonases: their role in disease development and Xenobiotic metabolism. The Springer-Verlag, 2008. ISBN 978-1-4020-6560-6.

CURRICULUM VITAE

The author was born on July 19th, 1978 in Babolsar, Iran. At the age of 12, his life in the Netherlands started with a year of 'International Switching Class'. He continued secondary school by getting his diplomas in three consecutive levels of secondary school, MAVO, HAVO (Scholengemeenschap Brabant, Den Bosch) and VWO (Durendael, Oisterwijk), eventually graduating in 1998. Then he started medical school at the university of Utrecht. As a medical student he spent 6 months at the Vascular Laboratory of the University Medical Center Utrecht (dr. M. Castro Cabezas and prof. dr. T.J. Rabelink), where he investigated the role of postprandial hyperlipidemia in leukocyte activation.

After obtaining his medical degree in 2005, he started the research described in this thesis at the department of Internal Medicine, Center for Diabetes and Vascular Medicine at the Sint Franciscus Gasthuis in Rotterdam under supervision of dr. M. Castro Cabezas and dr. J.W.F. Elte, in collaboration with the department of Cardiology of Leiden University Medical Center (prof. dr. J.W. Jukema). Part of the research was performed in 'Unitat de Recerca de Lípids i Arteriosclerosi', faculty of Medicine at the University of Rovira i Virgili in Reus, Spain (dr. J. Ribalta, Prof. dr. L. Masana).

Before starting his specialty training in Cardiology at the Sint Antonius Hospital Nieuwegein (dr. W. Jaarsma and dr. J.M. ten Berg), he fulfilled his 2 years (2009-2011) of Internal Medicine (dr. A.B.M. Geers and dr. W.J.W. Bos) at the same center and one year of Cardiology training at the Gelre Hospital Apeldoorn (dr. B.E. Groenemeijer and dr. R.A. Waalewijn). Arash is married to Josine Luijten and they have two sons, Noah and Timo.
