Inflammation: a link between metabolic syndrome and osteoarthritis?

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 18 juni 2013
klokke 16:15 uur

door

Lobke Marijn Gierman

geboren te Velp
in 1983

Promotiecommissie

Promotor: Prof. Dr. T.W.J. Huizinga

Co-promotor: Dr. A.-M. Zuurmond (TNO, Leiden)

Overige leden: Prof. Dr. P.E. Slagboom
Prof. Dr. G.J.V.M. van Osch (Erasmus Universiteit, Rotterdam)
Dr. P.M. van der Kraan (Radboud Universiteit, Nijmegen)

The studies presented in this thesis were performed at the Gaubius Laboratory of TNO, Leiden, the Netherlands. This work was financially supported by a grant from Dutch Top institute Pharma (project number T1-213)

Contents

Chapter 1	General introduction to osteoarthritis	7
Chapter 2	Profiling the secretion of soluble mediators by end stage osteoarthritis synovial tissue explants reveals a reduced responsiveness to an inflammatory trigger	27
Chapter 3	Metabolic profiling reveals differences in concentrations of oxylipins and related free fatty acid precursors secreted by the infrapatellar fat pad of end-stage osteoarthritis and normal donors	47
Chapter 4	An explorative study comparing levels of soluble mediators in healthy and osteoarthritic synovial fluid	73
Chapter 5	Metabolic stress-induced inflammation plays a major role in the development of osteoarthritis in mice	85
Chapter 6	Osteoarthritis development is induced by increased dietary cholesterol and can be inhibited by atorvastatin in APOE*3Leiden.CETP mice, a translational model for atherosclerosis	107
Chapter 7	Exploring high fat diet-induced osteoarthritis in APOE*3Leiden.CETP mice	129
Chapter 8	Summary and general discussion	149
Chapter 9	Nederlandse samenvatting	165
	Dankwoord	175
	List of publications	177
	Curriculum Vitae	179
