Author: Bourgeois, Quentin

Title: Monuments on the horizon : the formation of the barrow landscape throughout the 3rd and 2nd millennium BC

Date: 2013-01-10

Acknowledgements

The last four years of working on this PhD have been, without a doubt, wonderful years. Many people helped me throughout the entire process and it is my pleasure to thank them here. I hope I am not forgetting anyone!

A first big thanks should go to my partners in the *Ancestral Mounds* project, Karsten Wentink, Marieke Doorenbosch, Corrie Bakels and Annelou van Gijn. Our many fruitful discussions have made this project better than the sum of its parts.

Many other people also helped in some way or another. Marco Langbroek with the calculations of celestial bodies (Chapter 8). I would like to thank Alexander Verpoorte, Miguel-John Versluys, Erik van Rossenberg, Erik Drenth, Eric Lohof, Hans Kamermans, Martijn van Leusen, Roy van Beek and Stijn Arnoldussen for several discussions and pointers. Interesting (sometimes unrelated) discussions with my fellow PhD's, Maikel Kuijpers, Patrick Valentijn and Sasja van der Vaart. Leendert Louwe Kooijmans for insisting on writing a concise PhD. Maarten Wispelwey, Masja Parlevliet, Liesbeth Theunissen, Erik Dullaert and Luc Amkreutz for all helping with and facilitating parts of this work.

I must not forget to mention my partners-in-crime during our many barrow excavations, Arjan Louwen, Cris van der Linde, Maurits Pruysen and André Manders. Much fun we had!

Several people also contributed to the final stages of this work, Pjotter Tomas-Sannen for proof-reading the text and the crew at Sidestone for the final touches.

An extra mention must go to my promotor Harry Fokkens. The at times harsh discussions on preliminary chapters have certainly shaped and modified this book for the better!

A special thanks I reserve for my mentor David Fontijn, who was involved from the very first baby-steps in the direction of this PhD. I will never forget the many beautiful moments we had throughout the years. The many thought-provoking discussions and the wonderful excavations with all their ups and downs.

And of course not only colleagues were involved in this work. I will not forget the moral support from Donnie, Gerard, Laura and Miriam. The at times necessary escapes were very much appreciated.

My parents and my sister, firstly for their unrelenting support throughout the years and secondly for supporting me in the choice to live abroad amongst these funny Dutchmen. I would especially like to thank my father for introducing me to archaeology in the first place.

And lastly Marjolein. I feel that the entire acknowledgements could be dedicated to her, without doing justice to the help she provided me. The many evenings and weekends she spent alongside me editing the entire book, reading (very) early drafts, keeping me healthy and fed throughout the last year, months, weeks and days of this work, being so crazy as to join me in getting up at 4 in the morning to take pictures of barrows but especially for morally supporting me through the arduous process of writing and for just being around. Thank you.

Curriculum vitae

Quentin Bourgeois was born in 1982 in the city of Gent (Belgium). As the son of an archaeologist and a historian, his interest in the past was quickly awakened. From 1994 to 2000 he went to the Koninklijk Atheneum Voskenslaan in Gent, graduating in Latin and Modern Languages. In 2000 he started his studies at the Faculty of Archaeology, Leiden University. He graduated in august 2004 in the field of pre- and protohistory of North-Western Europe. The subject of his *doctoraal*-thesis was the long-term occupation of the *Maashorst* in the Southern Netherlands. In 2003 and 2004 he was employed by Archol bv, where he participated in several excavations at Nistelrode. From 2005 until 2008 he was employed as a researcher at the Faculty of Archaeology, Leiden University. During that time he created a database of all excavated barrows in the Low Countries, co-authored several papers, substituted and taught a number of classes and organised and co-led five excavations on barrows. In 2008 he started his PhD at the Faculty of Archaeology at Leiden University within the framework of the NWO-funded *Ancestral Mounds*-project. Throughout his PhD he continued to participate on excavations on barrows, co-authored several papers and co-edited a book on one of these excavations. As of October 2012, he is employed part-time at the Faculty of Archaeology as coordinator of the Honours Class.
