Financial support for printing of this thesis by Stichting Steunfonds Kankercentrum Friesland,  
Stichting Klinische Oncologie Leiden and the 3A-out Fonds is greatly acknowledged.

## Promotiecommissie

Promotores: *Prof. Dr. E.M. Noordijk*  
*Prof. Dr. J.W.H. Leer*

Co-promotor: *Dr. C.A.M. Marijnen*

Referent: *Prof. Dr. P.J. Hoskin (Mount Vernon Hospital, Northwood, UK)*

Overige leden: *Dr. H.M. Kroon*  
*Dr. E. Steenland*

The work presented in this thesis was financially supported by the Dutch Cancer Society (CKVO 93/07) and the Dutch Investigative Medicine Fund of the Health Insurance Executive Board (OG95-050).

*Voor mijn lieve ouders, Peter en Trees*

# Contents

- 1 Introduction and outline
- 2 Impact of randomized trial-outcome in the treatment of painful bone metastases; patterns of practice among radiation oncologists. A matter of believers versus non-believers?  
Radiotherapy and Oncology 2000, 56 (3), 279-281
- 3 Eénmalige bestraling van pijnlijke botmetastasen even effectief als meervoudige bestraling. Uitkomsten van de Nederlandse Botmetastasen Studie  
Nederlands Tijdschrift voor Geneeskunde 2002, 146 (35), 1645-1650
- 4 Single fraction radiotherapy is efficacious; a further analysis of the Dutch Bone Metastasis Study controlling for the influence of retreatment  
International Journal of Radiation Oncology Biology Physics 2004, 59 (2), 528-537
- 5 Patients with a favorable prognosis are equally palliated with single and multiple fraction radiotherapy: results on survival in the Dutch Bone Metastasis Study  
Submitted for publication
- 6 Simple radiographic parameter predicts fracturing in metastatic femoral bone lesions  
Radiotherapy and Oncology 2003, 69, 21-31
- 7 Comparative analysis of risk factors for pathological fracture in the setting of femoral metastases  
Journal of Bone and Joint Surgery (Br) 2004, 86-B (4), 566-573
- 8 Prediction of survival in patients with metastases in the spinal column  
Cancer 2005, 103 (2), 320-328
- 9 Cost-utility analysis of single versus multiple fraction radiotherapy in patients with painful bone metastases  
Journal of the National Cancer Institute 2003, 95 (3), 222-229
- 10 Discussion and future perspectives  
**Summary / Samenvatting**

## Appendix 1

The effect of a single fraction compared to multiple fractions on painful bone metastases: a global analysis of the Dutch Bone Metastasis Study  
Radiotherapy and Oncology 1999, 52 (2), 101-109

## Appendix 2

Participating investigators of the Dutch Bone Metastasis Study
