Dr. E.L.T. van den Akker, Erasmus MC Rotterdam

Table of contents

SECTION 1: Introduction and scope of the thesis	7
1. General introduction on diagnosis and treatment of obese children with insulin resistance	9
SECTION 2: Prevalence, diagnosis and follow up of children with insulin resistance	25
2. Population-Based Studies on the Epidemiology of Insulin Resistance in Children.	27
3. Definition of insulin resistance affects prevalence rate in pediatric patients; a systematic review and call for consensus	51
4. How to screen obese children at risk for type 2 diabetes mellitus?	91
5. A Follow-up Study on BMI-SDS and Insulin Resistance in Overweight and Obese Children at Risk for Type 2 Diabetes Mellitus.	103
SECTION 3: Treatment of obese children with insulin resistance	117
6 METFORMIN Study	119
a. METFORMIN: an efficacy, safety and pharmacokinetic study on the short-term and long-term use in obese children and adolescents - study protocol of a randomized controlled study.	121
b. Long-term treatment with metformin is effective in stabilizing BMI in obese, insulin resistant adolescents: results of a randomized double blinded placebo-controlled trial.	143
7. The effect of eighteen-month metformin treatment in obese adolescents: comparison of results obtained in daily practice with results from a clinical trial	169
SECTION 4: Conclusions and perspectives	183
8. Conclusions and perspectives on diagnosis and treatment of obese children with insulin resistance	185
9. Nederlandse samenvatting/Dutch Summary	205
APPENDICES	227
