About the author

Wouter Mensink (1979) studied public administration and public policy at the University of Twente, the Netherlands. His thesis (2002) was written for the university's Technology and Development Group. It concerned a comparison of the role of intellectuals in the Hungarian Revolution of 1956 and the Prague Spring of 1968. After graduating, he spent two years in Budapest, Hungary. He worked for research institutes, such as GKI Economic Research Co. and the Hungarian Science and Technology Foundation. Projects concerned the role of innovation in regional development and the socio-economic transition in Central and Eastern Europe. After returning to the Netherlands, he worked on a technology implementation project at the Municipality of Amsterdam and as a recruiter for Amnesty International. In 2006, he started working as a researcher for the Center for Technology and Innovation Management (CeTIM), and as a PhD candidate at Leiden University. Amongst other projects, he contributed to setting up a regional Living Lab. His PhD dissertation focuses on healthcare innovation from the point of view of subjectivation. A number of his articles were published in academic journals, conference proceedings and books. Next to his PhD and research work, he joined a master program in political philosophy at the University of Amsterdam, taking courses in the field of Science and Technology Studies. He hopes to graduate in 2012. Since 2011, he works for the Netherlands Institute for Social Research (SCP). He works on an evaluation of the Dutch Social Support Act (Wmo).
