**Author:** Osman, Mohd Hafeez Bin  
**Title:** Interactive scalable condensation of reverse engineered UML class diagrams for software comprehension  
**Issue Date:** 2015-03-10
Case Study Candidates

In this Appendix, we list the candidate projects for our case studies (Table A.1). Item mark with * are the selected case studies.

Table A.1: List of Case Study Candidates

List of Figures

1.1 Thesis Roadmap ................................................................. 7
2.1 Integrated Model [174] ......................................................... 14
2.2 Cognitive Design Elements for Software Exploration [156] .......... 15
2.3 The Software Development Life Cycle .................................... 16
2.4 Relationship between Forward Eng., Reverse Eng. and Other Related Terms [41] ................................................................. 16
2.5 Taxonomy of UML Version 2.4 [68] ........................................ 18
2.6 Tours Online Class Diagram (Domain Analysis) ....................... 19
2.7 Tours Online Class Diagram (Design Level) ............................ 20
2.8 Tours Online RE-CD (Code Level) ........................................ 20
2.9 The Process of Supervised Machine Learning [98] .................... 24
2.10 ROC and Precision-Recall Curves under Class Skew .............. 29
3.1 Classes in Design vs Classes in Implementation ...................... 40
3.2 ArgoUML Evolution in UML Diagrams and Number of Classes .... 44
4.1 Round-trip Engineering Experiment ....................................... 53
4.2 Altova Reverse Engineered Package Diagram .......................... 56
4.3 Reverse Engineered Sequence Diagram using Altova .................. 56
4.4 Round-trip Test Result ....................................................... 58
4.5 Example of Diagram on Aggregation Test ............................... 61
4.6 Number of Attributes and Methods ...................................... 61
4.7 Bidirectional Relationship with Two Separate Links .................. 63
5.1 Level of Detail Class Diagrams Preparation ............................ 74
5.2 Role of the Respondents .................................................... 76
5.3 Respondents Experience with Class Diagrams .......................... 76
5.4 Where did the Respondent Learn about UML ........................................ 77
5.5 Respondent’s skill on Class Diagram .................................................. 78
5.6 Respondents Like or Dislike Source Code vs UML ............................ 78
5.7 Programmers Like or Dislike Source Code vs UML ........................... 79
5.8 Software Architects Like or Dislike Source Code vs UML ................. 79
5.9 Software Designers Like or Dislike Source Code vs UML ............... 79
5.10 Class Diagram Skill per Role ............................................................. 79
5.11 Information of Attribute that Could be Left out ............................... 81
5.12 Types of Operation that could be Excluded in Class Diagrams .......... 81
5.13 Class Category ................................................................................. 82
5.14 Types of Class that could not be Included in Class Diagrams .......... 82
5.15 Class Role that could be Excluded in Class Diagrams ..................... 83
5.16 Types of Information the Respondents Look for in Class Diagrams ... 84
5.17 Information of Classes that could be Omitted ................................. 85
5.18 Information of Operations that could be Omitted ............................ 86
5.19 Important Criteria in a Class Diagram for Understanding a System ... 87
5.20 The Type of Relationship in Class Diagrams that the Respondents Look at First ................................................................. 87
5.21 The Features that a Tool Should have for Simplifying UML Class Diagrams 88

6.1 Role of the Respondents .................................................................... 99
6.2 Location of the Respondents .............................................................. 99
6.3 Class Diagram Skill and Years of Experience ................................... 100
6.4 Score Size Category (Question B1-B4) .............................................. 101
6.5 Score Coupling Category (Question B5-B10) .................................... 102
6.6 Score Inheritance Category (Question B11-B13) ............................... 103
6.7 Keywords to Include a Class in a Class Diagram .............................. 103
6.8 Class Diagram A (ATM System) ....................................................... 105
6.9 Respondents Selection of Classes that Should not be Included in an ATM System .............................................................................. 106
6.10 Class Diagram B (Library System) .................................................... 107
6.11 Respondents Selection of Classes that should not be Included in a Library System ........................................................................ 108
6.12 Respondents Selection of Classes that should not be Included in a Pacman Game (Forward Design) .................................................... 108
6.13 Pacman Game Forward Design (Class Diagram C) ......................... 110
6.14 Reverse Engineered Pacman Game (Class Diagram D) ................. 111
6.15 Respondents Selection of Classes that should not be Included in a Pacman Game (Reverse Engineered Design) ............................ 112

7.1 Design Abstraction Process ............................................................... 124
7.2 Average AUC Score for Every Dataset. ............................................. 128
