Ter verkrijging van  
de graad van Doctor aan de Universiteit Leiden,  
op gezag van de Rector Magnificus Dr. D.D. Breimer,  
hoogleraar in de faculteit der Wiskunde en  
Natuurwetenschappen en die der Geneeskunde,  
volgens besluit van het College voor Promoties  
te verdedigen op woensdag 11 Mei 2005  
klokke 14.15 uur

## **Promotiecommissie**

Promotores: Prof. dr. J.A. Bouwstra  
Prof. dr. M. Danhof

Referent: Prof. dr. V. Pr at-Haine  
(Unit  Pharmacie Gal nique, Universit  Catholique de  
Louvain, Bruxelles Belgium)

Overege Leden: Prof. dr. G.J. Mulder  
Prof. dr. F.W.H.M. Merkus  
Prof. dr. AP. IJzerman  
Prof. dr. T. Hankemeier

*Dedicated to:  
Rofi, Naila, and Nining,  
my mother and all of my parents,  
all of my brothers and sisters,  
for all their enormous love, patience, and support*

The investigations presented in this thesis was performed at the Division of Drug Delivery Technology, Leiden/Amsterdam Center for Drug Research, Leiden University, Leiden, The Netherlands and at the Department of Medicinal Chemistry, University Center of Pharmacy, University of Groningen, Groningen, The Netherlands.

This project was financially supported by QUE (Quality for Undergraduate Education) project Batch III year 2000 – 2004, Faculty of Pharmacy, Gadjah Mada University, Yogyakarta, Indonesia.

Transdermal iontophoretic delivery of dopamine agonists: *In vitro* - *in vivo* correlation based on novel compartmental modeling

**ISBN 90-9019405-3**

## TABLE OF CONTENTS

### Part A. General introduction

<b>Chapter 1</b>	Current progress in Parkinson's disease therapy with dopamine agonists: The role of transdermal iontophoretic delivery	1
<b>Chapter 2</b>	Scopes and intent of the investigations of the thesis	33

### Part B. *In vitro* optimization of transdermal iontophoretic delivery of dopamine agonists rotigotine and 5-OH-DPAT

<b>Chapter 3</b>	Transdermal iontophoresis of rotigotine across human stratum corneum <i>in vitro</i> : influence of pH and NaCl concentration	37
<b>Chapter 4</b>	Transdermal iontophoresis of rotigotine: influence of concentration, temperature and current density in human skin <i>in vitro</i>	55
<b>Chapter 5</b>	Transdermal iontophoresis of the dopamine agonist 5-OH-DPAT in human skin <i>in vitro</i>	69

### Part C. The development and application of novel compartmental models for transdermal iontophoretic transport *in vitro* and *in vivo*

<b>Chapter 6</b>	Compartmental modeling of transdermal iontophoretic transport: I. <i>In vitro</i> model derivation and application	87
<b>Chapter 7</b>	Compartmental modeling of transdermal iontophoretic transport: II. <i>In vivo</i> model derivation and application	109
<b>Chapter 8</b>	Pharmacokinetics and pharmacodynamics analysis of transdermal iontophoresis of 5-OH-DPAT in rats: <i>In vitro</i> – <i>in vivo</i> correlation	131
<b>Chapter 9</b>	The extended compartmental models of transdermal iontophoretic transport <i>in vitro</i> and <i>in vivo</i>	155

### Part D. Summary and future perspectives

<b>Chapter 10</b>	Summary and future perspective	177
<b>Chapter 11</b>	Samenvatting en toekomstperspectieven	191
	Acknowledgements	205
	Curriculum Vitae	207
	List of publications	208
