Author: Stechow, Louise von

Title: Delineating the DNA damage response using systems biology approaches

Issue Date: 2013-06-20

Erratum

Op de titel pagina van het proefschrift “*Delineating the DNA damage response using systems biology approaches*” van L. von Stechow is de datum van de verdediging onjuist weergegeven.

De correcte datum van de verdediging is:

Donderdag 20 juni, 2013

Delineating the DNA damage response using systems biology approaches

Louise von Stechow

Delineating the DNA damage response using systems biology approaches

Louise von Stechow

Thesis, Leiden University, 2013

ISBN: 978-94-6182-290-1

© 2013, Louise von Stechow

No part of this thesis may be reproduced or transmitted in any form, by any means, electronic or mechanical, without prior written permission of the author.

Delineating the DNA damage response using systems biology approaches

PROEFSCHRIFT

ter verkrijging van de graad van Doctor
aan de Universiteit van Leiden
op gezag van Rector Magnificus
prof.mr. C.J.J.M. Stolker
volgens het besluit van het College voor Promoties
te verdedigen op donderdag 20 Juni 2012
klokke 10.00 uur

door

Louise von Stechow

geboren te Lahnstein, Duitsland
in 1983

Promotie commissie

Promotor:	Prof. Dr. B. van de Water	Universiteit Leiden
Co-promotor:	Dr. E.H.J. Danen	Universiteit Leiden
Overige leden:	Prof. Dr. J. Kleinjans	Universiteit Maastricht
	Prof. Dr. A. Ijzerman	Universiteit Leiden
	Prof. Dr. M. Danhof	Universiteit Leiden
	Dr. J. Jonkers	Nederlands Kanker Instituut
	Dr. M. Tijsterman	Leiden University Medical Center

The studies presented in this thesis were performed in the Division of Toxicology,
LACDR, Leiden University.

Financial support for printing of this thesis came from:

- Havelland Stiftung, Berlin

TABLE OF CONTENTS

Chapter I

9

General introduction and scope of this thesis

Chapter II

31

Unraveling DNA damage response signaling networks through systems approaches

Chapter III

55

Systems Biology Approach Identifies The Kinase Csnk1a1 As A Regulator Of The DNA Damage Response In Embryonic Stem Cells

Chapter IV

95

The E3 ligase ARIH1 protects against genotoxic stress by initiating a 4ehp-mediated mRNA translation arrest

Chapter V

127

Metabolic pathways in the DNA damage response in pluripotent stem cells

Chapter VI

159

RNAi screen for targets for chemo-sensitization identifies the dual-specific phosphatase DUSP15 as a common regulator of distinct protective pathways in various cancer cell types

Chapter VII

183

General Discussion and outlook

Appendix

199
