PROEFSCHRIFT

ter verkrijging van  
de graad van Doctor aan de Universiteit Leiden,  
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,,  
volgens besluit van het College voor Promoties,  
te verdedigen op woensdag 28 september 2011,  
klokke 10.00 uur

door

Anabel Sofía de la Garza Rodea  
geboren te Mexico stad  
in 1979

**Promotor:**  
**Prof. dr. D. Valerio**

**Copromotores:**  
**Dr. S. Knaän-Shanzer**  
**Dr. A.A.F. de Vries**

**Beoordelingscommissie:**  
**Prof. dr. R.C. Hoeben**  
**Prof. dr. C.A. van Blitterswijk (Universiteit Twente)**  
**Prof. dr. J.J.G.M. Verschuuren**

The studies presented in this thesis were performed at the Leiden University Medical Center at the Department of Molecular Cell Biology, Leiden, the Netherlands. The research was possible by a PhD grant from the Universidad Autónoma de Nuevo León, Monterrey, Mexico, is gratefully acknowledged.

The printing of this thesis was financially supported by Harlan Laboratories and mainly by Javier de la Garza Aguilar, MD.

## Table of contents

Chapter 1	General introduction	7
Chapter 2	Long-term contribution of human bone marrow mesenchymal stromal cells to skeletal muscle regeneration in mice	65
Chapter 3	Myogenic properties of human mesenchymal stem cells derived from three different sources	89
Chapter 4	Pressure ulcers: description of a new model and the use of mesenchymal stem cells for repair	123
Chapter 5	Anomer-equilibrated streptozotocin solution for the Induction: of experimental diabetes in mice ( <i>mus musculus</i> )	149
Chapter 6	Regeneration of human muscle in a mouse model	163
Chapter 7	Exploitation of herpesvirus immune evasion strategies to generate non-immunogenic human mesenchymal stem cells for use in regenerative medicine	187
Chapter 8	General discussion	213
	Summary	221
	Samenvatting	227
	Acknowledgments	235
	List of publications	239
	Curriculum Vitae	243
