Author: Rimoldi, Alexander

Title: Clues from stellar catastrophes

Issue Date: 2016-03-29

Clues from Stellar Catastrophes

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C. J. J. M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 29 maart 2016
klokke 13:45 uur

door

Alexander Rimoldi

geboren te Auckland, Nieuw-Zeeland
in 1981

Promotiecommissie

Promotores: Prof. dr. S. F. Portegies Zwart (Universiteit Leiden)
 Dr. E. M. Rossi (Universiteit Leiden)

Overige leden: Prof. M. Campanelli (University of Rochester)
 Prof. T. Piran (Racah Institute of Physics)
 Prof. dr. H. J. A. Röttgering (Universiteit Leiden)
 Prof. dr. J. Schaye (Universiteit Leiden)
 Dr. J. Vink (Universiteit van Amsterdam)

ISBN: 978-94-028-0108-8

Cover design: Dylan Horrocks

The back cover shows the motion of gas seen from inside an exploding star, from the simulations of Chapter 4.

To my parents

*The world is so full of a number of things,
I'm sure we should all be as happy as kings.*
— 'Happy Thought', Robert Louis Stevenson

Contents

1	Introduction	1
1.1	Overview	1
1.2	Astrophysical phenomena in this thesis	2
1.2.1	Supernovae and supernova remnants	2
1.2.2	Supermassive black hole environments	4
1.2.3	Two tales of two stars: supernovae in binary systems	6
1.2.4	Two tales of two stars: stellar collisions and blue stragglers	7
1.3	Methods used in this thesis	9
1.3.1	A new numerical shock solver	9
1.3.2	AMUSE	9
1.3.3	Smoothed-particle hydrodynamics	10
1.3.4	Stellar structure and merger modelling	10
1.3.5	Monte Carlo and MCMC methods	11
1.4	Content of this thesis	12
1.5	Outlook	14
2	The fate of SNRs near quiescent SMBHs	17
2.1	Introduction	18
2.2	Gaseous environments of quiescent nuclei	20
2.3	Evolution of remnants around quiescent black holes: analytic foundations	21
2.3.1	End of the ejecta-dominated stage	23
2.3.2	Deceleration in the adiabatic stage	24
2.3.3	Intermediate-asymptotic transition	26
2.3.4	Transition to the radiative stage	26

2.4	Evolution of remnants around quiescent black holes: numerical treatment	27
2.4.1	General prescription	28
2.4.2	Comparison with analytic solutions for single power-law profiles	30
2.4.3	Caveats and limitations of the model	31
2.5	Galactic nuclei model	32
2.5.1	Characteristic radii	33
2.5.2	Gas models	34
2.5.3	Massive star distributions	36
2.6	Results	36
2.6.1	Deceleration lengths	37
2.6.2	Morphological evolution	40
2.6.3	Adiabatic SNR lifetimes	43
2.7	Discussion and conclusions	47
	Appendix 2.A: Integrals of density in the ejecta-dominated stage . .	49
	Appendix 2.B: Numerical treatment of shock self-interactions . . .	54
3	The contribution of SNRs to X-ray emission near quiescent SMBHs	57
3.1	Introduction	58
3.2	Galactic nuclear environments	60
3.2.1	Galactic Centre observations	60
3.2.2	Quiescent galactic nuclei as autarkic systems	61
3.3	SNR dynamical evolution	63
3.3.1	X-ray emitting lifetime	64
3.4	Number of adiabatic remnants in a snapshot observation . . .	64
3.5	X-ray luminosity from SNRs in the sphere of influence	68
3.5.1	SNR spectral properties	68
3.5.2	SNR X-ray luminosity	71
3.5.3	Detectability	76
3.6	The sphere of influence SFR	78
3.7	Discussion and conclusions	79
4	Simulations of stripped core-collapse supernovae in close binaries	83
4.1	Introduction	84
4.2	Method	87
4.2.1	Stellar models	87
4.2.2	Hydrodynamical model set-up	88

4.2.3	Simulation of the supernova explosion	90
4.2.4	Measured parameters	91
4.2.5	Convergence test	92
4.3	Results	94
4.3.1	Shock breakout	95
4.3.2	Impact and mass loss from the companion	96
4.3.3	Momentum transfer and the velocity of the companion	99
4.3.4	Properties of the larger-scale SNR	104
4.3.5	Post-impact state of the companion	106
4.4	Discussion and conclusions	108
5	A method to infer globular cluster evolution from observations of blue stragglers	113
5.1	Introduction	114
5.2	Method	115
5.2.1	BSS models	115
5.2.2	Grid approach	117
5.2.3	MCMC approach	119
5.3	Results	121
5.3.1	Grid results	121
5.3.2	MCMC results	123
5.3.3	An independent estimate of the core-collapse time	125
5.4	Discussion and conclusions	127
	Thesis summary	131
	Nederlandse samenvatting	135
	Bibliography	140
	Curriculum Vitae	157
	List of publications	159
	Acknowledgements	161
