Author: Verdolini, Silvia

Title: Modeling interstellar bubbles : near and far

Issue Date: 2014-02-20

Modeling interstellar bubbles: near and far

Silvia Verdolini

Modeling interstellar bubbles: near and far

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 20 februari 2014
klokke 13.45 uur

door

Silvia Verdolini
geboren te Jesi
in 1984

Promotiecommissie

Promotor: Prof. dr. A. G. G. M. Tielens

Overige leden: Prof. dr. H. J. A. Röttgering
Prof. dr. S. F. Portegies Zwart
Dr. J. Brinchmann
Dr. B. Groves

Max Planck Institute for Astronomy

Cover: Giulia Verdolini

a Giulia, Pia e Silvano

Il futuro di un fiume è alla sorgente.
Erri De Luca

Table of Contents

1	Introduction	1
1.1	High mass stars and the interstellar medium of galaxies	2
1.1.1	High mass star formation	2
1.1.2	H II regions	3
1.1.3	Interstellar bubbles	4
1.1.4	H II regions: dynamics	5
1.2	Star-forming galaxies	6
1.2.1	Line diagnostic diagrams	7
1.3	Thesis outlook	8
2	X-ray emission from stellar wind driven bubbles: the prototypical UltraCompact H II Region, G29.96-0.02	11
2.1	Introduction	12
2.2	The prototypical UltraCompact H II region: G29.96-0.02	13
2.3	Observations	15
2.3.1	IR observation of the star and its wind	15
2.3.2	X-ray observations	19
2.4	Numerical method	20
2.4.1	New approach to find blocks cut by a ray	21
2.4.2	Changes to the chemistry solver	21
2.4.3	Cooling	22
2.4.4	Stellar winds	23
2.4.5	Star moving	24
2.4.6	Mass loading	24
2.5	G29.96: simulations	25
2.5.1	Bow shock model	25
2.5.2	Modified champagne flow model	28
2.5.3	Modified champagne flow with mass loading	29
2.6	Comparison with observations	30
2.6.1	Simulated radio emission measure maps	30
2.6.2	Velocity maps	32
2.6.3	X-ray luminosity and spectral energy distribution	32
2.6.4	Summary	34
2.6.5	Discussion	36
2.7	Conclusions	37
2.8	Appendix: Code testing	38

3	A class of champagne flow H II regions with radiation pressure-driven dust waves	45
3.1	Introduction	46
3.2	H II region morphology	47
3.2.1	‘Closed’ bubbles	49
3.2.2	‘Broken/open’ bubbles	49
3.3	Dust waves	50
3.4	Numerical method	50
3.4.1	Setup	51
3.4.2	Initial conditions	51
3.5	Results of the simulations	52
3.5.1	Morphology	52
3.5.2	Velocity of the ionized gas	53
3.6	Discussion	55
3.6.1	Comparison with observations	55
3.6.2	Location of the dust wave	58
3.6.3	Champagne flow H II regions	60
3.6.4	Kinetic energy	60
3.6.5	Triggered star formation	60
3.7	Conclusions	61
4	A study of H II regions in NGC 6822 and the distribution of star-forming galaxies in emission line diagnostic diagrams	63
4.1	Introduction	64
4.2	Data set	65
4.2.1	Optical emission line images	65
4.2.2	Optical photometry	67
4.2.3	Mapping dust and gas	68
4.2.4	Ionized gas density	69
4.3	H II region expansion	70
4.3.1	Analytical models	71
4.3.2	Comparison to observations	72
4.4	Diagnostic diagrams	73
4.4.1	Spectral synthesis and photoionization models	74
4.4.2	Results	75
4.5	Discussion	77
4.5.1	Age	77
4.5.2	Density of the ISM	78
4.5.3	Ionization parameter	79
4.5.4	Comparison with SDSS galaxies	79
4.6	Conclusions	82

5	Line emission from radiation-pressurized H II regions. I. Internal structure and line ratios	85
5.1	Introduction	86
5.2	Photoionization models	88
5.2.1	Input parameters and calculations	88
5.2.2	Model outputs and physical parameters	90
5.3	Results	92
5.3.1	One-zone models	92
5.3.2	Full models	94
5.4	Comparison to previous work	97
5.5	Conclusions	98
6	Line emission from radiation-pressurized H II regions. II. Dynamics and population synthesis	101
6.1	Introduction	102
6.2	Method	103
6.2.1	Spectral synthesis and photoionization models	104
6.2.2	Population synthesis code	105
6.2.3	Calculation of the line emission	108
6.3	Results	110
6.3.1	Internal effects of radiation pressure and winds	110
6.3.2	Dynamical effects of radiation pressure	113
6.3.3	Influence of galactic parameters	119
6.4	Comparison to observations	120
6.5	Discussion and conclusions	123
	Bibliography	125
	Samenvatting	131
	Riepilogo	139
	Publications	145
	Curriculum Vitae	147
	Ringraziamenti	149
