Author: Ries, Marco
Title: Genomics driven metabolomics: novel strategies for the discovery and identification of secondary metabolites
Issue Date: 2014-02-25
Genomics driven metabolomics

Novel strategies for the discovery and identification of secondary metabolites
Genomics driven metabolomics - Novel strategies for the discovery and identification of secondary metabolites
Thesis, Leiden University, Leiden

ISBN: 9789074538817

Cover illustration: Secondary metabolites produced by *Penicillium chrysogenum* drawn as balls-and-sticks. Biosynthetic reactions, performed by the fungus, are indicated by dashed arrows. High structural similarity between two compounds, based on fragmentation tree comparison, is represented by solid two-headed arrows

- Novel strategies for the discovery and identification of secondary metabolites

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C. J. J. M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 25 februari 2014
klokke 11.15 uur

door
Marco Ries

geboren te Lauchhammer, Duitsland

in 1982
This research is supported by the Dutch Technology Foundation STW, which is part of the Netherlands Organisation for Scientific Research (NWO) and partly funded by the Ministry of Economic Affairs (project number 10469).
