Title: Nontraditional cardiovascular risk factors in end-stage renal disease : studies on inflammatory markers and thyroid hormones

Issue Date: 2014-12-03

**Nontraditional cardiovascular
risk factors in
end-stage renal disease**

*Studies on inflammatory markers and
thyroid hormones*

Studies presented in this thesis were partially made possible by financial support from the Dutch Kidney Foundation, the Jo Keur Foundation and an MD-PhD fellowship from the Leiden University Medical Centre.

Nontraditional cardiovascular risk factors in end-stage renal disease

Studies on inflammatory markers and thyroid hormones

PROEFSCHRIFT

ter verkrijging van de graad van Doctor
aan de Universiteit Leiden
op gezag van Rector Magnificus
prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 3 december 2014
klokke 15:00 uur

door

Christiaan Lucas Meuwese

geboren te Zeist in 1986

Promotiecommissie

Promotores: Prof. dr. F.W. Dekker
Prof. dr. P. Stenvinkel (*Renal Department, Karolinska Institutet, Stockholm*)

Co-promotor: Dr. J.J. Carrero (*Renal Department, Karolinska Institutet, Stockholm*)

Overige leden: Prof. dr. J.W. de Fijter
Prof. dr. A.M. Pereira Arias
Dr. J.H. Kirkels (*Afdeling Cardiologie, UMCU, Utrecht*)

The printing of this thesis was financially supported by Stichting Cardiovasculaire Biologie, Karolinska Institutet, Amgen, Sanofi, Baxter, Fresenius, Bayer, Shire, and the Leurs Stichting.

Contents

Chapter 1	General Introduction	7
Part I	Inflammatory markers	
Chapter 2	Regular monitoring of C-reactive protein in the dialysis patient: forewarned is forearmed Nature Reviews Nephrology. 7, 166-176 (2011).	15
Chapter 3	Trimestral variation patterns of C-reactive protein, interleukin-6 and tumor necrosis factor- α are similarly associated with survival in hemodialysis patients Nephrology Dialysis & Transplantation. 26, 1313-1318 (2011).	37
Chapter 4	Variations in C-reactive protein during a single haemodialysis session do not associate with mortality Nephrology Dialysis & Transplantation. 25, 3717-3723 (2010).	51
Part II	Thyroid hormones	
Chapter 5	Nonthyroidal illness and the cardio-renal syndrome Nature Reviews Nephrology. 9, 599-609 (2013).	65
Chapter 6	Impact of baseline levels and trimestral variation of triiodothyronine and thyroxine on mortality in maintenance hemodialysis patients. Clinical Journal of the American Society of Nephrology. 7, 131–138 (2012).	89
Chapter 7	Nonthyroidal illness: a risk factor for coronary calcification and arterial stiffness in patients undergoing peritonealdialysis? Journal of Internal Medicine. 274, 584-593 (2013).	103
Chapter 8	Thyroid status and renal function in older persons in the general population. Journal of Clinical Endocrinology & Metabolism. Epublication, (2014).	117
Chapter 9	Summary & General Discussion	131
Chapter 10	Dutch Summary	143
Chapter 11	Appendices	149
Chapter 12	Acknowledgements	155
Chapter 13	Curriculum Vitae & List of Publications	159
