The fight for a reactive site

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P. F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 10 december 2009
klokke 13.45 uur

door

Irene Monique Nicolette Groot

geboren te Amsterdam in 1980

Promotiecommissie

Promotores:	Prof. dr. A. W. Kleyn
	Prof. dr. G. J. Kroes
Co-promotores:	Dr. L. B. F. Juurlink
	Dr. R. A. Olsen
Overige leden:	Prof. dr. J. Brouwer
	Prof. dr. M. C. van Hemert
	Prof. dr. M. T. M. Koper
	Prof. dr. A. C. Luntz
	Dr. M. Rost
	Prof. dr. P. Saalfrank
	Prof. dr. S. Stolte

The research described in this thesis was partially made possible by financial support from Stichting Fundamenteel Onderzoek der Materie (FOM), which is financially supported by de Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO).

Productie en vormgeving omslag: F&N Boekservice

Voor mama

A scientist in his laboratory is not only a technician: He is also a child placed before natural phenomena which impress him like a fairy tale.

Marie Curie (1867-1934)

Contents

1	Introduction	9
1.1	Heterogeneous catalysis	9
1.2	Reactions of atoms and molecules on surfaces	10
1.3	Dissociative adsorption of H_2 on a metal surface	12
1.4	$H_2 + Ru(0001)$ and $H_2 + Pt(S)$: Background and motivation	13
1.4.1	H_2 dissociation on $Ru(0001)$ and CO-precovered $Ru(0001)$	14
1.4.2	Dissociative adsorption of H_2 on stepped platinum	16
1.5	Outline and major results of this thesis	18
1.6	Outlook	21
1.6.1	Hydrogen dissociation on bare $Ru(0001)$	21
1.6.2	Hydrogen dissociation on CO-precovered $Ru(0001)$	23
1.6.3	Hydrogen dissociation on stepped platinum	24
2	Experimental set-up and techniques	31
2.1	Ultra-high vacuum set-up	31
2.2	Molecular beam techniques	33
2.3	Surface science techniques	34
2.3.1	Temperature programmed desorption spectroscopy	34
2.3.2	Low energy electron diffraction	35
2.4	Experimental procedures	36
2.4.1	Time-of-flight spectrometry	36
2.4.2	King and Wells technique	38
3	Computational methods and approximations	45
3.1	The Born-Oppenheimer approximation	45
3.2	Density functional theory	46
3.3	Building the potential energy surface	47
3.3.1	Electronic structure calculations	47
3.3.2	Modified Shepard interpolation method	48
3.3.3	Implementation of the MS method in GROW	49
3.4	Quantum dynamical calculations: the time-dependent wave packet method	50
3.4.1	The initial wave packet	51
3.4.2	Time propagation	52
3.4.3	Asymptotic analysis of the wave packet	52
3.4.4	Optical potential	54
3.4.5	Finite basis representations and discrete variable representations	54

3.5	Quasi-classical trajectory calculations	58
3.6	Molecular beam simulation	58
3.7	The CO/Ru(0001) system	60
4	Supersonic molecular beam studies of dissociative adsorption of H₂ on Ru(0001)	65
4.1	Introduction	65
4.2	Experimental apparatus and methods	66
4.3	Results	68
4.4	Discussion	69
4.5	Summary	74
5	A theoretical study of H₂ dissociation on ($\sqrt{3} \times \sqrt{3}$)R30° CO/Ru(0001)	79
5.1	Introduction	79
5.2	Theory	81
5.2.1	H ₂ + CO/Ru(0001) system	81
5.2.2	Electronic structure calculations	81
5.2.3	Locating barriers along different H ₂ dissociation paths	83
5.2.4	Two-center projected density of states calculations	85
5.3	Results and discussion	85
5.3.1	Barrier heights and locations	85
5.3.2	An energy decomposition and a molecular orbital analysis of the H ₂ approach to the surface and the subsequent dissociation	90
5.4	Conclusions	95
6	Dynamics of dissociative adsorption of hydrogen on a CO-precovered Ru(0001) surface: A comparison of theoretical and experimental results	101
6.1	Introduction	101
6.2	Theory	103
6.2.1	Potential energy surface	103
6.2.2	Quasi-classical trajectory calculations	108
6.2.3	Quantum dynamics calculations	110
6.2.4	Molecular beam simulation	111
6.3	Results and discussion	114
6.4	Conclusions	123
7	Dynamics of hydrogen dissociation on Pt(211)	127
7.1	Introduction	127
7.2	Experimental apparatus and methods	128
7.3	Results	129
7.4	Discussion	130
7.5	Summary	133

8	Dynamics of hydrogen dissociation on stepped platinum	137
8.1	Introduction	137
8.2	Experimental apparatus and methods	139
8.3	Results and discussion	140
8.3.1	Reaction mechanisms	140
8.3.2	Modeling reactivity on stepped platinum	147
8.5	Conclusions	150
	Nederlandse samenvatting	153
	List of publications	157
	Curriculum Vitae	159
	Nawoord	161
