**Molecular dissection of Cdc6 and
the miR-148 family;
two stories with common themes**

The research described in this thesis was performed at the department of Tumour Biology at the Netherlands Cancer Institute (NKI) and supported by the Dutch Cancer Society (KWF) and a European Young Investigator award (EURYI) to Reuven Agami. The printing of this thesis was supported by the Dutch Cancer Society (KWF) and Leiden University.

Cover Pictures were taken by A. D. and show HeLa cell nuclei.

Printed by PrintPartners Ipskamp, Enschede, The Netherlands

two stories with common themes**

proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 14 mei 2008
klokke 13.45 uur

door

Anja Maaïke Duursma

geboren te Leuven (België)
in 1978

Promotiecommissie

- Promotor:** Prof. Dr. J. J. Neefjes
- Co-promotor:** Dr. R. Agami
Nederlands Kanker Instituut, Amsterdam
- Referent:** Prof. Dr. R. Bernards
Universiteit Utrecht
- Overige leden:** Prof. Dr. R. H. Medema
Universiteit Utrecht
- Dr. B. Blom
Universiteit van Amsterdam
- Dr. A. G. Jochemsen
- Prof. Dr. L. H. Mullenders
- Prof. Dr. P. J. van den Elsen

Contents

Chapter 1	Introduction: Molecular mechanisms of cancer development	7
Chapter 2	p53-dependent regulation of Cdc6 protein stability controls cellular proliferation	23
Chapter 3	CDK-dependent stabilization of Cdc6: linking growth and stress signals to activation of DNA replication	45
Chapter 4	miR-148 targets human Dnmt3b protein coding region	55
Chapter 5	Differential expression of miR-148 in hematopoietic thymic subsets and its potential function	67
Chapter 6	miR-152 plays a role in S-phase and G2/M-phase cell cycle progression of diploid fibroblasts	81
Chapter 7	General Discussion	91
