Title: Prevention of sudden cardiac death in patients with chronic kidney disease, focusing on implantable cardioverter defibrillator therapy

Issue Date: 2014-11-26

**Prevention of sudden cardiac death in patients
with chronic kidney disease, focusing on
implantable cardioverter defibrillator therapy**

Mihály Krisztián de Bie

The studies described in this thesis were performed at the Department of Cardiology of the Leiden University Medical Center, Leiden, the Netherlands

cardioverter defibrillator therapy**

Proefschrift

Ter verkrijging van
de graad van Doctor aan de Universiteit van Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 26 november 2014
klokke 13:45 uur

door

Mihály Krisztián de Bie
geboren te Dordrecht
in 1983

Promotiecommissie

Promotores:

Prof. dr. J.W. Jukema

Prof. dr. T.J. Rabelink

Co-Promotor:

Dr. L. van Erven

Overige leden:

Prof. dr. M.J. Schalij

Prof. dr. J.J. Bax

Prof. dr. C.A.J.M. Gaillard, UMCG, Groningen

Dr. B. van Dam, MCA, Alkmaar

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged

Aan mijn ouders en aan Georgette

Des Lebens Mühe lehrt uns allein des Lebens Güter schätzen
Johann Wolfgang von Goethe 1749 - 1832

Alleen de enorme inspanningen die het leven van ons vergt leren ons de goede dingen ervan waarderen.

Table of Contents

Chapter I	General introduction and outline of the thesis	9
Part I	<i>Prevention of Sudden Cardiac Death and identifying high risk patients</i>	
Chapter II	The current status of interventions aiming at reducing sudden cardiac death in dialysis patients.	19
Chapter III	How to reduce sudden cardiac death in patients with renal failure.	33
Chapter IV	Prevention of sudden cardiac death: rationale and design of the Implantable Cardioverter Defibrillators in Dialysis patients (ICD2) Trial-- a prospective pilot study.	51
Chapter V	Incremental prognostic value of an abnormal baseline spatial QRS-T angle in chronic dialysis patients.	63
Chapter VI	Echocardiographical determinants of an abnormal spatial QRS-T angle in chronic dialysis patients.	77
Chapter VII	Left ventricular diastolic dysfunction in dialysis patients assessed by novel speckle tracking strain rate analysis: prevalence and determinants.	91
Chapter VIII	CT coronary angiography is feasible for the assessment of coronary artery disease in chronic dialysis patients, despite high average calcium scores.	105
Chapter IX	Abdominal Aortic Calcification on a plain X-Ray and the Relation with Significant Coronary Artery Disease in Asymptomatic Chronic Dialysis Patients	119

Part II	<i>Implantable cardioverter therapy complications and troubleshooting</i>	
Chapter X	Implantation-related complications of implantable cardioverter-defibrillators and cardiac resynchronization therapy devices: a systematic review of randomized clinical trials.	133
Chapter XI	Chronic kidney disease and ICD related complications, 16 years of experience.	145
Chapter XII	Cardiac device infections are associated with a significant mortality risk.	159
Chapter XIII	Trans-venous lead removal without the use of extraction sheaths, results of >250 removal procedures.	171
Chapter XIV	Suitability for subcutaneous defibrillator implantation: results based on data from routine clinical practice.	185
Chapter XV	Summary and conclusions Samenvatting en conclusies List of Publications Dankwoord Curriculum Vitae	201
