Author: Gupta, Vikas
Title: Multimodality cardiac image analysis for the assessment of coronary artery disease
Issue Date: 2013-09-11

Multimodality Cardiac Image Analysis for the Assessment of Coronary Artery Disease

Vikas Gupta

Colophon

About the covers:

Front: The circles (credit: DryIcons) represent contours that are ubiquitous in cardiac image processing e.g., myocardial contours, blood vessel lumen, and concentric rings in a bull's eye plot. In addition, different colors of circles represent multiple imaging techniques for assessing cardiac function and anatomy. At the center lies the human heart.

Back: The back cover points to the likely convergence of the future developments in cardiac imaging towards a better integration of functional (red heart with gears) and anatomical (green heart with vessels) information on the human heart.

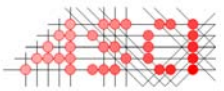
Promotiecommissie

Promotores:	Prof. dr. ir. B. P. F. Lelieveldt Prof. dr. ir. J. H. C. Reiber
Co-promotores:	Dr. E. A. Hendriks *Delft University of Technology, Delft* Dr. M. van de Giessen
Overige leden:	Prof. dr. E. van der Wall Prof. dr. ir. M. J. T. Reinders *Delft University of Technology, Delft* Dr. J. T. Marcus *VU University Medical Center, Amsterdam*



This work was carried out in the ASCI graduate school.
ASCI dissertation series number: 285

This research was supported by a grant from the Dutch Ministry of Economic Affairs (AgentschapNL) under the title *Het Hart in Drie Dimensies* (PID06003).

Financial support for the publication of this thesis was kindly provided by:

- ASCI research school,
- Bontius Stichting inz. Doelfonds beeldverwerking,
- BioClinica, Leiden,
- Cardialysis BV, Rotterdam,
- Medis Medical Imaging Systems BV, Leiden, and
- Library of the University of Leiden.

Contents

Contents **i**

1 Introduction **1**
1.1 Background . . . 3
1.2 Coronary artery disease (CAD) . . . 3
1.3 Non-invasive cardiac imaging for the detection of CAD . . . 3
1.3.1 Myocardial perfusion imaging . . . 4
1.3.2 Computed tomography based imaging . . . 6
1.4 Motivation and objectives . . . 6
1.5 Thesis overview . . . 7

2 A survey of Cardiac MR image processing methods **9**
2.1 Background . . . 12
2.1.1 Cardiac MR perfusion (CMRP) image acquisition . . . 12
2.1.2 Perfusion quantification . . . 14
2.1.3 CMRP image artifacts . . . 16
2.2 Classification of CMRP image processing methods . . . 19
2.3 Methods based on registration . . . 20
2.3.1 Rigid transformations based registration methods . . . 22
2.3.2 Non-rigid/Elastic transformations based registration . . . 25
2.4 Methods based on segmentation . . . 27
2.4.1 Model independent . . . 27
2.5 Methods for multi-modality information fusion and visualization . . . 30
2.6 Conclusion . . . 34

3 Fully automatic registration and segmentation in cardiac MR perfusion images **39**
3.1 Background . . . 42
3.1.1 Independent Component Analysis (ICA) . . . 42
3.1.2 Active Appearance Model (AAM) . . . 43
3.2 Data . . . 44
3.2.1 AAM Training Data . . . 44
3.2.2 Perfusion Testing Data . . . 45
3.2.3 Ground truth contours . . . 45
3.3 Methods . . . 46
3.3.1 ICA based Registration . . . 46

3.3.2 AAM based Segmentation . . . 48
3.3.3 Validation Indices . . . 48
3.3.4 Statistical Analysis . . . 49
3.3.5 Implementation details . . . 49
3.4 Results . . . 49
3.5 Discussion . . . 51
3.5.1 Spatial correspondence . . . 51
3.5.2 Myocardial perfusion analysis . . . 53
3.5.3 Limitations . . . 54
3.5.4 Future perspectives . . . 55
3.6 Conclusion . . . 56
3.7 Acknowledgment . . . 56

4 A frequency domain approach to respiratory motion correction in cardiac MR stress perfusion sequences 57
4.1 Method . . . 61
4.1.1 Registration . . . 61
4.1.2 Automatic ROI selection . . . 64
4.2 Data . . . 64
4.3 Experimental setup . . . 65
4.3.1 Ground truth . . . 65
4.3.2 Validation experiments . . . 66
4.3.3 Implementation Details . . . 67
4.4 Results . . . 67
4.4.1 Residual motion . . . 67
4.4.2 Perfusion parameters . . . 68
4.4.3 Computation time . . . 68
4.5 Discussion . . . 68
4.5.1 Residual motion . . . 70
4.5.2 Perfusion parameters . . . 71
4.5.3 Clinical significance . . . 73
4.5.4 Limitations . . . 73
4.6 Conclusion . . . 74

5 Comprehensive visualization of multimodal cardiac imaging data for assessment of coronary artery disease: first clinical results of the SMARTVis tool 75
5.1 Related work . . . 81
5.2 Method . . . 82
5.2.1 CTCA image analysis . . . 82
5.2.2 Cardiac perfusion MR image analysis . . . 84
5.2.3 Data fusion and integration . . . 84
5.2.4 Coordinated and multiple views . . . 85
5.2.5 Visualization for comprehensive analysis . . . 85
5.2.6 Implementation . . . 88
5.3 Evaluation . . . 88
5.3.1 Data . . . 88

5.3.2 Case-study design . . . 89
5.3.3 Expert feedback . . . 94
5.4 Discussion, limitations and future work . . . 95
5.5 Conclusions . . . 97

6 Additional diagnostic value of integrated analysis of cardiac CTA and SPECT-MPI using the SMARTVis system in patients with suspected coronary artery disease 99
6.1 Materials and Methods . . . 101
6.1.1 Study population . . . 101
6.1.2 SPECT-MPI . . . 101
6.1.3 Computed Tomography based Angiography . . . 102
6.1.4 Quantitative Coronary Angiography . . . 104
6.1.5 SMARTVis : a software-based CTA/SPECT-MPI fusion system . . . 104
6.1.6 Study design . . . 105
6.1.7 Analysis . . . 105
6.2 Results . . . 107
6.2.1 SPECT-MPI findings . . . 107
6.2.2 CTA findings . . . 107
6.2.3 QCA findings . . . 108
6.2.4 Findings of Side-by-Side analysis . . . 109
6.2.5 Findings of fused analysis . . . 110
6.2.6 Comparison of Fused and Side-by-Side Analysis . . . 111
6.3 Discussion . . . 111
6.3.1 Additional diagnostic value of cardiac CTA and SPECT-MPI fused analysis . . . 111
6.3.2 Comparison to previous studies . . . 113
6.3.3 Limitations and strengths of the study design . . . 114
6.4 Conclusion . . . 114
