**Printed by** GVO, Enschede, The Netherlands
**ISBN/EAN** 978-94-6332-092-4

The research described in this thesis was carried out at the Leiden University Medical Center (Leiden) and the Netherlands Cancer Institute-Antoni van Leeuwenhoek Hospital (Amsterdam).

The studies described in this thesis were financially supported by a Eurostars grant (grant no. E! 7555), an NWO-STW-VIDI grant (grant no. STW BGT11272), a KWF translational research award (grant no. PGF 2009-4344), a European Research Council under the European Union's Seventh Framework Program (FP7/2007-2013) grant (grant no. 2012-306890), and the Leiden University Fund / Den Dulk-Moermans.

Financial support from the Van den Berg family, Chipsoft, EUROMEDICAL Instruments, EURORAD S.A., Hamamatsu Photonics K.K., IDB Holland B.V., Intuitive Surgical Inc., KARL STORZ Endoscopie Nederland B.V., Medi-Radiopharma Co., Ltd, Mermaid Medical, ONCOVISION, PI Medical Diagnostic Equipment B.V., and SurgicEye GmbH for the printing of this thesis is gratefully acknowledged.

# ADVANCING SURGICAL GUIDANCE: FROM (HYBRID) MOLECULE TO MAN AND BEYOND

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 10 november 2016
klokke 13.45 uur

door

Nynke Sjoerdtje van den Berg
geboren te Harlingen
in 1986

# TABLE OF CONTENTS

1. General introduction, outline of this thesis 9

## PART ONE

2. Fluorescence guidance in urologic surgery 15
3. Hybrid tracers for sentinel node biopsy 37

## PART TWO

4. Concomitant radio- and fluorescence-guided sentinel node biopsy in squamous cell carcinoma of the oral cavity using ICG-$^{99m}$Tc-nanocolloid 63
5. A hybrid radioactive and fluorescent tracer for sentinel node biopsy in penile carcinoma as a potential replacement for blue dye 79
6. Multimodal surgical guidance during sentinel node biopsy for melanoma: Combined gamma tracing and fluorescence imaging of the sentinel node through use of the hybrid tracer ICG-$^{99m}$Tc-nanocolloid 97

## PART THREE

7. (Near-infrared) fluorescence guided surgery under ambient light conditions, a next step to embedment of the technology in clinical routine 119
8. Optimization of fluorescence guidance during robot-assisted laparoscopic sentinel node biopsy for prostate cancer 139
9. Multispectral fluorescence imaging during robot-assisted laparoscopic sentinel node biopsy: A first step towards a fluorescence-based anatomical roadmap 159
10. A pilot study of SPECT/CT-based mixed-reality navigation towards the sentinel node in patients with melanoma or Merkel cell carcinoma of a lower extremity 179
11. First-in-human evaluation of a hybrid modality that allows combined radio- and (near-infrared) fluorescence tracing during surgery 191

## OUTLOOK

12. Sentinel node biopsy for prostate cancer: A hybrid approach 211
