Ignazio Maggio

geboren te Catania, Italië
in 1986

Promotor: Prof. Dr. R.C. Hoeben

Co-promotor: Dr. M.A.F.V. Gonçalves

Leden promotiecommissie:

Prof. Dr. A.M. Aartsma-Rus

Prof. Dr. G. Dickson (Royal Holloway, University of London)

Prof. Dr. T. VandenDriessche (Free University of Brussels)

The research presented in this thesis was performed at the department of Molecular Cell Biology, Leiden University Medical Center, Leiden, the Netherlands. This research was in part supported by the Dutch Prinses Beatrix Spierfonds (W.OR11-18) and the French AFMTéléthon (grant number 16621).

*To my mom, dad and brother,
for their endless and essential support.*

*A mia mamma, mio papà e mio fratello
per il loro inesauribile e indispensabile sostegno.*

Contents

General introduction		9
<hr/>		
Chapter 1	Genome editing at the crossroads of delivery, specificity, and fidelity	13
<hr/>		
Chapter 2	Adenoviral vector delivery of RNA-guided CRISPR/Cas9 nuclease complexes induces targeted mutagenesis in a diverse array of human cells	41
<hr/>		
Chapter 3	Adenoviral vector DNA for accurate genome editing with engineered nucleases	67
<hr/>		
Chapter 4	Selection-free gene repair after adenoviral vector transduction of designer nucleases: rescue of dystrophin synthesis in DMD muscle cell populations	95
<hr/>		
Chapter 5	Adenoviral vectors encoding CRISPR/Cas9 multiplexes rescue dystrophin synthesis in unselected populations of DMD muscle cells	137
<hr/>		
Chapter 6	The emerging role of viral vectors as vehicles for <i>DMD</i> gene editing	169
<hr/>		
Conclusions and final remarks		191
<hr/>		
Addendum	English Summary Nederlandse samenvatting Curriculum Vitae PhD portfolio List of publications Acknowledgements	195
