Title: From signal transduction to targeted therapy : interference with TGF- β and myostatin signaling for Duchenne muscular dystrophy

Date: 2012-10-16

FROM SIGNAL TRANSDUCTION TO TARGETED THERAPY:

Interference with TGF- β and Myostatin signaling
for Duchenne muscular dystrophy

Dwi Utami Kemaladewi

ISBN: 978-94-6182-157-7

Cover image: The distribution of FAM-labelled AON in the mdx triceps 6 hours after intramuscular injection

Cover design and layout: Ella Nirmala and Offpage

Printed by: Offpage

FROM SIGNAL TRANSDUCTION TO TARGETED THERAPY:

Interference with TGF- β and Myostatin signaling
for Duchenne muscular dystrophy

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof.mr. P.F. van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 16 Oktober 2012
klokke 15.00 uur

door

Dwi Utami Kemaladewi
geboren te Surabaya, Indonesië
in 1986

TABLE OF CONTENTS

Chapter 1	Introduction	11
1.1.	TGF- β signaling	12
1.2.	Role of TGF- β signaling in adult skeletal muscle regeneration and regulation of muscle mass	14
1.2.1.	TGF- β	
1.2.2.	Myostatin	
1.2.3.	Other ligands	
1.3.	Duchenne muscular dystrophy (DMD)	17
1.3.1.	DMD pathology	
1.3.2.	Involvement of TGF- β family members in DMD pathology	
1.4.	Overview of DMD therapy based on TGF- β inhibition	22
1.4.1.	TGF- β antagonists	
1.4.2.	Myostatin antagonists	
1.4.3.	Antagonists targeting multiple TGF- β ligands	
1.4.4.	BMP antagonists	
1.4.5.	Other compounds	
1.5.	Therapeutic approaches to correct the damaged <i>DMD</i> gene or compensate the lack of dystrophin	27
1.5.1.	Utrophin upregulation	
1.5.2.	Cell therapy	
1.5.3.	Gene therapy	
1.5.4.	Stop codon read-through	
1.5.5.	Exon skipping	
1.6.	The scope of this thesis	35
Chapter 2	Cell-type specific regulation of myostatin signaling	49
Chapter 3	Dual exon skipping in myostatin and dystrophin	71
Chapter 4	Exon skipping in TGF- β and myostatin receptors	89
Chapter 5	General discussion	115

5.1.	The challenges in developing DMD therapies	116
5.2.	The challenges in developing DMD therapy based on TGF- β family signaling pathway	117
5.3	Evaluation and opportunities to develop TGF- β inhibitor in other muscle disease	122
5.4	Comparison with other TGF- β inhibition strategies in non-muscle diseases	124
5.5.	Bringing DMD therapy to a reality	126
	Summary	134
	Samenvatting (Summary in Dutch)	136
	Curriculum vitae	138
	List of publications	139
	List of abbreviations	140
	Acknowledgements	142
