Patient Blood Management in Elective Orthopaedic Surgery

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. P.F.van der Heijden,
volgens besluit van het College voor Promoties
te verdedigen op woensdag 31 oktober 2012
klokke 15.00 uur

door

Cynthia So-Osman

geboren te Jakarta, Indonesië in 1966

PROMOTIECOMMISSIE

Promotores:

Prof. dr. A. Brand

Prof. dr. R. G. H. H. Nelissen

Co-promotor

Dr. A. W. M. M. Koopman-van Gemert (Albert Schweitzer Ziekenhuis, Dordrecht)

Overige leden

Dr. J. G. van der Bom

Prof. dr. J. A. N. Verhaar (Erasmus MC, Rotterdam)

Dr. R. Slappendel (Amphia ziekenhuis, Breda)

Prof. dr. J. L. Carson (UMDNJ-Robert Wood Johnson Medical School New Brunswick, New Jersey)

Parts of the research described in this thesis were supported by a grant from ZonMW (Doelmatigheid KE 945-06-601), by a grant from Sanquin Blood Supply (PPOC 03-002) and by a grant from LUMC (Doelmatigheid P01.065). Financial support for laboratory research was provided by Van Straten Medical, Nieuwegein, Astra Tech, Zoetermeer, Haemonetics BV, Breda and Roche Pharma, Woerden.

Printing of this thesis was financially supported by Sanquin Research, HemoCue Diagnostics B. V., Vifor Pharma B. V., Anna Fonds Leiden and S₂RO.

Contents

Chapter 1	General Introduction: Current transfusion alternatives in elective orthopaedic surgery	9
Chapter 2	A randomized comparison of transfusion triggers in elective orthopaedic surgery using leucocyte-depleted red blood cells	23
Chapter 3	The impact of a restrictive transfusion trigger on post-operative complication rate in elective orthopaedic surgery: a post-hoc analysis of a randomised study	41
Chapter 4	Postoperative anaemia after joint replacement surgery is not related to quality of life during the first two weeks postoperatively	55
Chapter 5	Efficacy, safety and user-friendliness of two devices for postoperative autologous shed red blood cell re-infusion in elective orthopaedic surgery patients: a randomized pilot-study	73
Chapter 6	Salvaged blood and cytokine gene expression after hip surgery	87
Chapter 7	A randomised controlled trial on erythropoietin and blood salvage as transfusion alternatives in orthopaedic surgery using a restrictive transfusion policy	101
Chapter 8	Further improvement in Patient Blood Management	135
Chapter 9	Designing a strategy to implement cost-effective blood transfusion management in elective hip and knee arthroplasties: a study protocol	149
Chapter 10	Summary / Samenvatting	161
	Dankwoord	167
	Curriculum Vitae	169
	Publications / Publicaties	171
