Table of contents

List of abbreviations	6
1 General introduction	9
2 Cationic ruthenium-Cp-diphosphine complexes as catalysts for the allylation of phenols with allyl alcohol	33
3 [RuCp(PP)] ⁺ -catalyzed allylation of phenols: a gem-dialkyl-type effect induces high selectivity for O-allylation	53
4 Remarkable activity of the isomerization catalyst [RuCp(PPh ₃) ₂](OTs) in O-allylation of phenol with allyl alcohol	71
5 Scope of the allylation reaction with [RuCp(PP)] ⁺ catalysts: changing the nucleophile or allylic alcohol	87
6 Immobilization of ruthenium catalysts for allylations with allyl alcohol as allylating agent	103
7 Theoretical study on the mechanism of [RuCp(PP)] ⁺ -catalyzed allylations of phenols with allyl alcohol	123
8 Palladium-diphosphine complexes as catalysts for allylations with allyl alcohol	143
9 Selective O-allylation of bisphenol A: the ultimate goal	157
10 Summary, conclusions and outlook	165
Samenvatting	175
List of publications	180
Curriculum Vitae	183
Nawoord	185
