Issue Date: 2013-03-27

Engaging students in the study of physics

An investigation of physics teachers' belief systems about teaching and learning physics

Nelleke Belo

ICLON

ICLON, Leiden University Graduate School of Teaching

ico

The research was carried out in the context of the *Dutch Interuniversity Center for Educational Research*

A 6-week visiting student scholarship to UC Berkeley (CA, USA) in 2009 was partly funded by the Leids Universitair Fonds (LUF).

Title: Engaging students in the study of physics: An investigation of physics teachers' belief systems about teaching and learning physics

Titel: Leerlingen interesseren voor het vak natuurkunde: een onderzoek naar de opvattingssystemen van natuurkundedocenten over het leren en onderwijzen van natuurkunde

INHOUD

CHAPTER 1	General introduction	15
1.1	Introduction	17
1.2	Theoretical framework and purpose of the research	17
1.2.1	The knowledge base of teaching	17
1.2.2	Purpose of the dissertation	19
1.3	Literature review	19
1.3.1	Research on teacher beliefs	19
	<i>The problem of defining teacher 'beliefs'</i>	19
	<i>Fundamental assumptions about 'teacher beliefs'</i>	20
	<i>Measuring teacher beliefs</i>	21
	<i>The relationship between knowledge and beliefs</i>	21
	<i>The relationship between beliefs and the practice of teaching</i>	21
1.3.2	Context of the dissertation: Science/Physics education	22
	<i>Traditions in research on science education</i>	22
	<i>The content of science curricula</i>	23
	<i>Secondary physics education in the Netherlands</i>	24
1.3.3	Physics teachers' beliefs about teaching and learning physics	25
1.4	Outline of the dissertation	27
1.4.1	Main aim of the research	27
1.4.2	Overview of the studies including design and research questions	28
	<i>Study 1 (Chapter 2)</i>	28
	<i>Study 2 (Chapter 3)</i>	28
	<i>Study 3 (Chapter 4)</i>	29
	<i>Study 4 (Chapter 5)</i>	29
	<i>General conclusions and discussion (Chapter 6)</i>	30

CHAPTER 2	An exploration of teacher beliefs about making physics comprehensible, motivating students, and different types of regulation: An interview study	31
	Abstract	32
2.1	Introduction	33
2.2	Literature review	34
2.2.1	Beliefs about 'what' students are learning	34
	<i>General goals of science education</i>	34
2.2.2	Beliefs about 'how' students are learning	35
	<i>Conceptions of learning in general</i>	35
	<i>The regulation of students' learning processes</i>	35
	<i>Teaching procedures to enhance students' comprehension of content</i>	36
	<i>Student engagement and motivation</i>	37
2.3	Research questions	38
2.4	Method	38
2.4.1	Data collection	39
	<i>Sample</i>	39
	<i>Instrument</i>	39
	<i>Procedure</i>	39
2.4.2	Data analysis	39
	<i>Selection of interview fragments for analysis</i>	40
	<i>Coding and interrater agreement</i>	40
2.5	Results	42
2.5.1	Learning physics	42
2.5.2	Doing physics	45
2.5.3	Learning about physics	48
2.6	Conclusions and discussion	51
2.6.1	Main conclusions	51
	<i>Beliefs about 'making physics comprehensible' and 'motivating students'</i>	51
	<i>Types of regulation that were expressed in teachers' and teacher educators' beliefs</i>	51
2.6.2	Discussion	52
	<i>Limitations of the present study</i>	52
	<i>Beliefs related to the goals of 'Learning physics' and 'Doing physics'</i>	52
	<i>Beliefs related to the goal of 'Learning about physics'</i>	53
	<i>Types of regulation, conceptions of learning in general, and student engagement</i>	54
	<i>Implications for secondary physics education</i>	55

CHAPTER 3	Beyond the dichotomy of teacher- versus student-focused education: A survey study on physics teachers' beliefs about the goals and pedagogy of physics education	57
	Abstract	58
3.1	Introduction	59
3.2	Theoretical framework	60
3.2.1	Research on teacher beliefs	60
3.2.2	Assumptions about teacher beliefs	61
3.3	Literature review	61
3.3.1	Research on science teachers' beliefs about teaching and learning science	61
	<i>Metaphors to describe teachers' beliefs about teaching and learning in general</i>	61
	<i>Science teachers' beliefs about teaching and learning science</i>	62
3.3.2	Teacher beliefs about teaching and learning in general	63
3.3.3	Domain-specific teacher beliefs	65
3.4	Research questions	65
3.5	Method	66
3.5.1	Data collection	66
	<i>Sample and procedure</i>	66
	<i>Instruments</i>	66
3.5.2	Data analysis	68
3.6	Results	69
3.6.1	The underlying factor structure of teachers' beliefs	69
3.6.2	Means and standard deviations of questionnaire scales	72
3.6.3	Bivariate Pearson correlations between the mean scale scores	73
3.6.4	Identifying patterns in teachers' beliefs	74
3.7	Conclusions and discussion	77
3.7.1	Conclusions	77
3.7.2	Discussion	78
	<i>Limitations of the present study</i>	79
	<i>Implications</i>	79

CHAPTER 4	The use of contrasting philosophical positions to explore teacher beliefs about the nature of science: A large-scale survey study	81
	Abstract	82
4.1	Introduction	83
4.2	Literature review	84
4.2.1	Research on teacher beliefs	84
4.2.2	Research on teachers' beliefs about NOS	85
4.2.3	Controversial NOS issues	86
	<i>Philosophical debates about objectivity and truth</i>	86
	<i>Intentional, epistemic, and methodological dimension of NOS</i>	87
4.3	Focus of the study and research question	88
4.4	Method	88
4.4.1	Data collection	88
	<i>Sample and procedure</i>	88
	<i>Instrument</i>	89
4.4.2	Data analysis	90
4.5	Results	91
4.5.1	Statistical analyses	91
	<i>The underlying factor structure of teachers' beliefs about the nature of science</i>	91
	<i>Means and standard deviations of the questionnaire scales</i>	92
	<i>Bivariate Pearson correlations between mean scale scores</i>	93
4.5.2	Identifying belief patterns	93
4.6	Conclusions and discussion	95
4.6.1	Conclusions	95
4.6.2	Discussion	95
	<i>The content and structure of teachers' beliefs about the nature of science</i>	95
	<i>The categorization and characterization of teachers' beliefs about NOS</i>	96
	<i>Limitations and future research</i>	97
	<i>Implications</i>	97

CHAPTER 5	Depicting physics to secondary students: A small-scale explorative interview study on physics teachers' beliefs and intentions	99
	Abstract	100
5.1	Introduction	101
5.2	Theoretical framework	102
5.2.1	Depicting the nature of physics at school	102
5.2.2	Beliefs and teaching behavior	103
	<i>Teacher beliefs and the practice of teaching</i>	103
	<i>Beliefs and intentions</i>	103
5.3	Research questions	104
5.4	Method	104
5.4.1	Data collection	105
	<i>Sample and procedure</i>	105
	<i>Instrument</i>	106
5.4.2	Data analysis	107
5.5	Results	107
5.5.1	Beliefs about the nature of physics and science	107
	<i>Beliefs about the aim of scientific inquiry</i>	108
	<i>Beliefs about the tentativeness of scientific theories</i>	109
	<i>Beliefs about the difference between scientific 'theories' and 'laws'</i>	109
	<i>Beliefs about the purposes of physics as a research field</i>	109
5.5.2	Beliefs about teaching and learning physics	110
	<i>Beliefs about the goals of physics education</i>	110
	<i>Beliefs about the pedagogy of teaching and learning physics</i>	112
5.5.3	Relations between teachers' beliefs	114
	<i>Relations between particular beliefs about the nature of physics and NOS</i>	114
	<i>Relations between particular beliefs about teaching and learning physics</i>	114
	<i>Relations between beliefs about the nature of physics and NOS and beliefs about teaching and learning physics</i>	115
5.5.4	Teachers' intentions expressed in a lesson plan of an introductory physics lesson	115
	<i>Intentions with regard to lesson objectives</i>	115
	<i>Intentions with regard to specific teaching and learning activities</i>	116
5.5.5	Manifestations of teachers' beliefs in teaching intentions	117
	<i>Relations between Ann's beliefs and intentions</i>	118
	<i>Relations between Brandon's beliefs and intentions</i>	118
	<i>Relations between Chris's beliefs and intentions</i>	119

5.6	Conclusions and discussion	120
5.6.1	Main conclusions	120
	<i>Content and structure of teachers' belief systems</i>	120
	<i>Manifestations of teachers' beliefs in their intentions</i>	120
5.6.2	Discussion	121
	<i>Manifestation of beliefs in teaching intentions</i>	121
	<i>Teachers' beliefs about the nature of physics and NOS</i>	121
	<i>Limitations of the present study</i>	122
	<i>Implications and future research</i>	122
CHAPTER 6	General conclusions and discussion	123
6.1	Introduction	125
6.2	Summary of the main conclusions of the four studies	125
6.2.1	Small-scale semi-structured interview study (Study 1, chapter 2)	125
6.2.2	Survey study (Study 2, chapter 3)	126
6.2.3	Large-scale survey study (Study 3, chapter 4)	127
6.2.4	Structured interview study (Study 4, chapter 5)	128
6.3	Synthesis and general conclusions	130
6.4	Discussion	132
6.4.1	The measurement of teacher beliefs	132
6.4.2	Theoretical perspectives on teacher cognitions	133
	<i>'Orientations toward science teaching' as part of the PCK construct</i>	133
	<i>Teachers' practical knowledge or 'phronesis'</i>	134
	<i>Teachers' pedagogical constructions</i>	135
	<i>The competence of explicit professional reasoning</i>	136
6.4.3	Strengths and limitations of the studies	137
	<i>Strengths</i>	137
	<i>Limitations</i>	137
6.5	Implications	139
6.5.1	Suggestions for further research on teacher beliefs	139
6.5.2	Teacher education and professional development	140
6.5.3	Implementation of curriculum innovations	141
6.5.4	The joint responsibility of physics teachers, teacher educators, and physicists	142

REFERENCES	145
SUMMARY/SAMENVATTING	161
Summary	163
Chapter 1: General introduction	163
Chapter 2: An exploration of teacher beliefs about making physics comprehensible, motivating students, and different types of regulation: An interview study	163
Chapter 3: Beyond the dichotomy of teacher- versus student-focused education: A survey study on physics teachers' beliefs about the goals and pedagogy of physics education	165
Chapter 4: The use of contrasting philosophical positions to explore teacher beliefs about the nature of science: A large-scale survey study	166
Chapter 5: Depicting physics to secondary students: A small-scale explorative interview study on physics teachers' beliefs and intentions	167
Chapter 6: General conclusions and discussion	168
Samenvatting	171
Hoofdstuk 1: Algemene introductie	171
Hoofdstuk 2: Een exploratie van docentopvattingen over het begrijpelijk maken van natuurkunde, het motiveren van leerlingen en verschillende regulatietypen: een interviewstudie	171
Hoofdstuk 3: Een stap verder dan de dichotomie van docent- en leerlinggericht onderwijs: een vragenlijststudie naar de opvattingen van natuurkundedocenten over de doelen en didactiek van het natuurkundeonderwijs	173
Hoofdstuk 4: Een exploratie van docentopvattingen over de aard van natuurwetenschap met behulp van contrasterende filosofische posities: een grootschalige vragenlijststudie	175
Hoofdstuk 5: De beeldvorming van natuurkunde bij leerlingen in het voortgezet onderwijs: een kleinschalige exploratieve interviewstudie naar de opvattingen en intenties van natuurkundedocenten	176
Hoofdstuk 6: Algemene conclusies en discussie	177

APPENDICES	179
Appendix 1	181
Interview script to investigate teacher beliefs about the goals and pedagogy of teaching and learning physics (chapter 2)	181
<i>Central questions</i>	181
<i>General questions</i>	181
<i>Questions about the students</i>	181
<i>Questions about conceptual physics knowledge</i>	182
<i>Questions about assessment</i>	182
<i>Questions about the community</i>	182
<i>Final questions</i>	183
Appendix 2	183
Examples of questionnaire items to measure teacher beliefs about the goals of physics education and the pedagogy of teaching and learning physics (chapter 3)	183
<i>Orientation towards instruction and the goals of education</i>	183
<i>Beliefs about learning and the regulation of students' learning processes</i>	183
<i>Curriculum emphases in teaching physics</i>	183
Appendix 3	184
Examples of questionnaire items to measure teacher beliefs about the nature of science (chapter 4)	184
<i>Intentional dimension: descriptivist and instrumentalist items</i>	184
<i>Epistemic dimension: absolutist and relativist items</i>	184
<i>Methodological dimension: inductivist and deductivist items</i>	184
Appendix 4	185
Format structured interview to investigate teacher beliefs about the nature of physics and science, teaching and learning physics, and teaching intentions (chapter 5)	185
A. <i>Teacher beliefs about the nature of physics</i>	185
B. <i>Teacher beliefs about the nature of science (NOS) (Lederman, et al., 2002)</i>	185
C. <i>Teacher beliefs about what image of physics he or she would like to portray to secondary students (aged 12–18)</i>	185
D. <i>Assignment – Imaginary case</i>	186
<i>Teacher beliefs about the lesson plan</i>	186
<i>Teacher beliefs about regular physics lessons</i>	186
E. <i>End of the interview</i>	186
Appendix 5	187
Three lesson plans that were designed for an introductory physics lesson (chapter 5)	187
<i>Teacher Ann's lesson plan</i>	187
<i>Teacher Brandon's lesson plan</i>	187
<i>Teacher Chris's lesson plan</i>	188
