CURRICULUM VITAE

Bhanumas Chantarasuwan was born on 6 August 1971 in Krabi province, Thailand, where he lived in a rural village. His first botanical contacts where initiated by the village elders, who learned him to recognise edible plants in the nearby forest. Bhanumas finished his secondary education at Nuaklongprachabamrung School, Krabi, in 1992, and left for Bangkok to study at the Faculty of Forestry, Kasetsart University. He obtained his Bachelor degree of Sciences (Forestry) in 1996. During his Bachelor study he was drawn into botany by Associate Professor in dendrology Somnuek Phongampai, especially during the two-week dendrological field course in the forest. Next, he had to fulfil his military service in the navy in 1998 and he spent one year in the marine base at Sattahib, Chon Buri. Three years later (2001) he became a permanent staff member in The Thailand National Science museum, where his routine work is surveying plant diversity and collecting plant specimens for the museum. In 2007, he fulfilled his master degree in Forest Biology, also in Kasetsart University. His interest in *Ficus* (Moraceae) was inspired by Mrs. Sumon Masuthon, a lecturer in the Botany Department, a pioneer researcher in the taxonomy of Thai *Ficus*. During a field trip in 2003 Prof.dr. Cornelis C. Berg was the second person who stimulated him to work on *Ficus*. Bhanumas could fulfill his ideal to study *Ficus* when he was granted a scholarship for taxonomic studies by the Ministry of Science and Technology on behalf of the Royal Thai Government, under the responsibility of the Thailand National Science Museum. He started his Ph.D. at the National Herbarium of the Netherlands, Leiden University (now Naturalis Biodiversity Center), under the supervision of Prof.dr. Peter C. van Welzen and Prof. dr. Berg. After his graduation he will continue his career as a staff member of the Thailand National Science Museum, Pathum Thani province, Thailand.

ACKNOWLEDGEMENTS

I would like to express my gratitude to the Royal Thai Government and the Ministry of Science and Technology for the scholarship I received to study in The Netherlands. I also like to acknowledge the strong support of the Thailand National Science Museum to fulfil my study in Plant Taxonomy at Leiden University.

I am grateful to all staff members and curators of A, AAU, B, BK, BKF, BM, BR, BRI, E, K, L, P, PERTH, SING, THNHM, U, WAG, and Z for providing herbarium material, specimen data and help during visits. I like to acknowledge Finn Kjellberg and Nina Rønsted for their hospitality during my stays in France and Denmark and I like to mention Bob Harwood, Claudia Baider, and Sukonthip Sirimongkol for providing plant material precious for my work. Anita Walsmit Sachs, Esmée Winkel, and Pajaree Inthachup made the beautiful and outstanding drawings.

I would like to express my deepest gratitude to my family and my relatives: My parents, who carefully raised me and encouraged me to love learning since I was young; my wife and my son, who always supported and motivated me to finish the PhD, and my great sister, Naovarat Ratanopas, who took care of me like a son.

I would like to thanks to all my friends for their help and friendship: Anne van Oostrum, Annick Lang, Atchara Teerawattananon, Chatchai Jaitrong Dome Potikanond, Dome Prathumthong, Judith Aiglsperger, Kanchana Pruesapan, Lalin Kovudhikulrungsri, Luis Morgado, Marc Appelhans, Mega Atria, Narongsak Kidsom, Nicolas Davin, Nor Yahaya, Nurul Hazlina, Onanong Nuchuchua, Piya Temviriyankul, Ponchai Kleangnin, Sanchai Makchai, Saranyapin Potikanond, Sarawood Sungkaew, Saroj Ruchisansakul, Sita Polpok, Sunwan Klaassen, Sutee Duangjai, Tanawat Chaowasku, Tamara Vernimmen, Weyawat Jaitrong, Yodchai Chuaykern and Yotsawate Sirichamorn.

Finally, I like to dedicate this thesis to Dr. Jarujin Nabhetabhata (1950–2008), my former director, who encouraged me to focus on a study of *Ficus*, and who also advised me to study abroad for my PhD. I also like to dedicate the thesis to Prof. dr. Cornelis C. Berg (1934–2012), the world expert on the taxonomy of *Ficus*, my great supervisor, who provided the taxonomic fundamentals without which I could never have studied for a PhD on figs.
