de graad van Doctor aan de Universiteit van Leiden,
op gezag van de Rector Magnificus dr. D.D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens het besluit van het College voor Promoties
te verdedigen op woensdag 22 november 2006
klokke 15.00 uur
door

Naghmeh Riyazi

geboren te Teheran, Iran
in 1972

Promotiecommissie

Promotoren:	Prof. dr. F.C. Breedveld, Prof. dr. F.R. Rosendaal, Prof. dr. P.E. Slagboom
Co-promotor:	Dr. G. Kloppenburg
Referent:	Prof. dr. J.W.J. Bijlsma (Universitair Medisch Centrum Utrecht)

Contents

Chapter I	General Introduction	7
Chapter II	Evidence for familial aggregation of hand, hip, and spine but not knee osteoarthritis in siblings with multiple joint involvement: the GARP study	19
Chapter III	Association of the risk of osteoarthritis with high innate production of interleukin-1beta and low innate production of interleukin-10 ex vivo, upon lipopolysaccharide stimulation	33
Chapter IV	Risk factors in familial osteoarthritis. The GARP study	47
Chapter V	HLA class II is associated with distal interphalangeal osteoarthritis	61
Chapter VI	The role of interleukin 10 promoter polymorphisms in the susceptibility of distal interphalangeal osteoarthritis	71
Chapter VII	Discrepancies of disease and disability in hand osteoarthritis	83
Chapter VIII	Activity limitations in the lower extremities in patients with osteoarthritis: the modifying effects of illness perceptions and mental health	99
Chapter IX	Summary	115
Chapter X	Nederlandse samenvatting	123
