Allosteric modulation by sodium ions and amilorides of G protein-coupled receptors : a closer look at the sodium ion site of the adenosine A2a receptor and development of a mass spectrometry ligand binding assay for adenosine A1 and A2a receptors

Massink, A.

Allosteric modulation by sodium ions and amilorides of G protein-coupled receptors

A closer look at the sodium ion site of the adenosine A_{2A} receptor

and

Development of a mass spectrometry ligand binding assay for adenosine A_1 and A_{2A} receptors

Arnault Massink

The research described in this thesis was performed at the Division of Medicinal Chemistry of the Leiden Academic Centre for Drug Research, Leiden University (Leiden, The Netherlands). The research was financially supported by the Netherlands Organization for Scientific Research - Chemical Sciences (NWO-TOP #714.011.001).

Cover design by Bastiaan van Manen.

Printed by Ipskamp Drukkers (Enschede, The Netherlands).

Allosteric modulation by sodium ions and amilorides of G protein-coupled receptors

A closer look at the sodium ion site of the adenosine A_{2A} receptor

and

Development of a mass spectrometry ligand binding assay for adenosine A_1 and A_{2A} receptors

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 8 december 2016
klokke 11.15 uur

door

Arnault Massink
geboren te Parijs, Frankrijk
in 1982

Promotor:	Prof. dr. A.P. IJzerman
Promotiecommissie:	Prof. dr. J.A. Bouwstra
	Prof. dr. M. Danhof
	Dr. J. Carlsson (Universiteit Uppsala, Zweden)
	Prof. dr. M. Smit (Vrije Universiteit Amsterdam, Nederland)
	Prof. dr. B. van de Water
	Prof. dr. T. Hankemeier
