Acknowledgement

First and foremost, I would like to express my deep and sincere gratitude to Prof. Bernard Comrie for his unparalleled patience and invaluable support during my PhD years. Without this, the present dissertation would have never seen the light of day.

Another person, to whom I am indebted in so many ways, is Prof. Elizaveta Kotorova. She was the one who introduced me, while I was still an undergraduate student, to the world of linguistics in general, and to the Ket language in particular. It was her decision to invite me to take part in the project of compiling a Ket dictionary that shaped my future as a Ketologist and led to writing this work. Without any doubts, I was so very lucky to have her help and encouragement through all the ups and downs during the years.

My sincere appreciation also goes to my fellow Ketologists Ekaterina Klopotova, Heinrich Werner, Stefan Georg, and especially to Edward Vajda, who was a constant source of help and inspiration to me.

I owe a lot to all my Ket language consultants, but especially to Valentina Romanenkova who spent countless hours working with me without losing her patience and willingness to help me in my research.

I am very grateful to Prof. Maarten Mous for his invaluable help on the final stages of this dissertation work, and to Eugenie Starpert for her ultrafast help with Dutch.

A big thank you goes to my fellow PhD students Alena Witzlack-Makarevich, Zaira Khalilova and Zarina Molochieva for making my stay in Leipzig a really fun and lovely time.

I would also like to thank all my colleagues at the "Laba" (Language Laboratory) of the Department of Indigenous Languages of Siberia at Tomsk State Pedagogical University for the great time in the pre-Leipzig era, as well as all my "non-linguist" friends who had no idea what Ket is and why it is important to study such endangered languages, and still supported me anyway.

Last and certainly not the least, I would like to thank my family who has always encouraged and supported me, no matter what choices I made.
