**The Impact of Climate Variability on the Ecology of a Lion
(*Panthera leo Linnaeus 1758*) Population and Lion
Livestock Conflicts in the Amboseli Ecosystem – Kenya**

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden
op gezag van de Rector Magnificus prof. mr. C.J.J. M. Stolker
volgens besluit van het College voor Promoties
ter verdedigen op donderdag 19 november 2015
klokke 13.45 uur

door

TUQA JIRMO HUQA

Geboren te Obbu, Kenya
in 1973

Promotie commissie

Promotores: Prof. dr. G.R. de Snoo (Universiteit Leiden)
Prof. dr. G.A. Persoon (Universiteit Leiden)
Co-promotor: Prof. dr. ir. H.H. de longh
(Universiteit Leiden/Universiteit Antwerpen)

Overige leden: Prof. dr. H. Leirs (Universiteit Antwerpen)
Prof. dr. B. Patterson (Chicago Field Museum of Natural History/
University of Chicago)
dr. A. Loveridge (Universiteit Oxford)

Table of Contents

1	Introduction	11
1.1	The importance of conserving large carnivores and lion as a species	11
1.2	Protected areas and their importance for the conservation of lion and other large carnivores	12
1.3	Conservation status: effects of land use and climate change on populations of lions and other carnivores	13
1.4	Current lion population status in Kenya and in the Amboseli Ecosystem	16
1.5	Conservation of lions in the Amboseli Ecosystem	17
1.6	Problem statement and justification	18
1.7	Research design and conceptual framework	19
1.7.1	Natural climate variability	19
1.7.2	Bio-physical environment	20
1.7.3	Human environment	21
1.8	Conceptual framework	23
1.9	Hypotheses	23
1.10	Main objective	24
1.11	Study assumptions	24
1.12	Study area: Amboseli National Park and ecosystem description	25
1.13	Location	27
1.14	Geology and soil	27
1.15	Land use	28
1.16	Thesis organization	29
	<i>References</i>	30
2	Impact of a Drought on the Social Structure of a Lion Population in the Amboseli Ecosystem, Kenya	39
	<i>Abstract</i>	39
2.1	Introduction	40
2.2	Material and methods	42
2.2.1	Study area	42
2.2.2	Assessment of drought severity and prey abundance	42

2.2.3	Field observations and sampling technique for lion population structure	45
2.2.4	Data analysis and statistics	47
2.3	Results	47
2.4	Discussion	51
2.4.1	Impact of drought severity, prey abundance and related lion retaliatory killing	51
2.4.2	Effect on lion sex ratio	53
2.4.3	Effect on lion social structure and group size	53
	<i>Acknowledgements</i>	54
	<i>References</i>	55
3	Impact of Severe Climate Variability on Lion Home Range and Movement Patterns in the Amboseli Ecosystem, Kenya	59
	<i>Abstract</i>	59
3.1	Introduction	60
3.2	Materials and methods	62
3.2.1	Study area	62
3.2.2	Methods	63
3.2.3	Home range analysis	64
3.2.4	Statistical analysis	66
3.3	Results	68
3.3.1	Relationship between rainfall, home range and movement patterns	68
3.3.2	Mixed modeling and model comparisons	70
3.4	Discussion	74
3.4.1	Home ranges and movement patterns	74
3.4.2	Lion movement and landscape connectivity	75
	<i>Acknowledgements</i>	76
	<i>References</i>	76
4	Effects of Stochastic Drought on Prey Abundance and Selection by Lions in the Amboseli National Park – Kenya	83
	<i>Abstract</i>	83
4.1	Introduction	84
4.2	Study area: the Amboseli Ecosystem	85
4.3	Methods	86
4.3.1	Assessment of rainfall variability	86

4.3.2	Seasonal prey composition	87
4.3.3	Scat analysis	89
4.3.4	Data management	90
4.3.5	Data analysis and statistics	91
4.4	Results	92
4.4.1	Rainfall variability and severe drought	92
4.4.2	Herbivore density and seasonal fluctuation	92
4.4.3	Lion prey composition	93
4.4.4	Changes in diet composition	94
4.4.5	Prey preference and selectivity	95
4.5	Discussion	98
4.5.1	Impact of rainfall variability on prey densities	99
4.5.2	Prey distribution and density	99
4.5.3	Lion diet composition and preference	100
	<i>References</i>	103

5	Local Knowledge and Attitudes towards Livestock Predation by Large Carnivores in the Amboseli Ecosystem (Southern Kenya)	107
	<i>Abstract</i>	107
5.1	Introduction	108
5.2	Study area: the Amboseli Ecosystem	110
5.3	Methods	111
5.3.1	Assessment of livestock predation trends	111
5.3.2	Wild herbivore abundance measure	112
5.3.3	Survey on attitudes	112
5.3.4	Methods of data collection	113
5.3.5	Data analysis	113
5.4	Results	114
5.4.1	Part I: Seasonal incidence of livestock and the influence of severe drought on livestock attacks	114
5.4.2	Part II: Community attitudes	118
5.5	Discussion	123
5.5.1	Livestock predation trends	123
5.5.2	Influence of drought on specific livestock predation in relation to wild prey abundance and rainfall	124
5.5.3	Community attitudes and views	125
	<i>References</i>	128
	<i>Questionnaires</i>	133

6	Synthesis, Conclusions, and Recommendations	137
6.1	Lion population response to environmental stochasticity and implications for conservation: A synthesis	137
6.2	Lion population trends and response to environmental stochasticity	138
6.3	Lion home range, movement patterns and connectivity provides opportunity for mitigation and adaptation	139
6.4	Lion prey availability and diet shift – a realized niche in constrained predator-prey relationships	141
6.5	Livestock predation trends, community knowledge and attitude	142
6.6	Conclusions	144
6.7	Recommendations for conservation and management	145
	<i>References</i>	147
	Summary	151
	Samenvatting	157
	Acknowledgements	163
	Curriculum Vitae	165
