The link between baryons and dark matter

*ISBN: 978-94-6233-116-7*

# Probing the darkness: The link between baryons and dark matter

Proefschrift

ter verkrijging van  
de graad van Doctor aan de Universiteit Leiden,  
op gezag van Rector Magnificus prof.mr. C.J.J.M. Stolker,  
volgens besluit van het College voor Promoties  
te verdedigen op woensdag 11 november 2015  
klokke 10.00 uur

door

Marco Velliscig

geboren te Udine, Italië  
in 1985

Promotiecommissie

Promotor:	Prof. dr. Joop Schaye	
Co-promotor:	Dr. Marcello Cacciato	
Overige leden:	Prof. dr. Koen Kuijken	University of Leiden
	Prof. dr. Sarah Bridle	University of Manchester
	Dr. Henk Hoekstra	University of Leiden
	Dr. Benjamin Joachimi	University College London

Cover: painting from Gabriela Calistro Rivera, graphics designed by the author and Mattia Fumagalli.

*Alla mia famiglia  
senza la quale non sarei niente*

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Numerical simulations in astrophysics . . . . .	1
1.1.1	Dark matter-only simulations . . . . .	1
1.1.2	Hydrodynamical simulations . . . . .	1
1.2	Gravitational lensing . . . . .	3
1.2.1	Single lens . . . . .	5
1.2.2	Statistical weak lensing . . . . .	6
1.3	This Thesis . . . . .	8
<b>2</b>	<b>Impact of galaxy formation on halo properties</b>	<b>11</b>
2.1	Introduction . . . . .	12
2.2	Simulations . . . . .	15
2.2.1	Finding and matching haloes between simulations . . . . .	17
2.3	How baryons alter the masses of haloes . . . . .	18
2.3.1	Change in total mass between different realisations of the same halo .	18
2.3.2	Change in baryon mass and back-reaction on dark matter . . . . .	22
2.3.3	Baryon fractions . . . . .	24
2.3.4	Enclosed mass profiles . . . . .	24
2.3.5	Evolution with redshift . . . . .	25
2.3.6	Effect of cosmology . . . . .	28
2.4	Analytic fitting formula for the change in halo mass . . . . .	28
2.5	Effects of baryons on the halo mass function . . . . .	29
2.5.1	Analytic fitting formula for the halo mass function . . . . .	32
2.5.2	Implications for cluster number counts . . . . .	33
2.6	Comparison with previous studies . . . . .	36
2.7	Summary and Conclusions . . . . .	39
2.A	Resolution test . . . . .	43
<b>3</b>	<b>Galaxy-halo misalignment</b>	<b>47</b>
3.1	Introduction . . . . .	48
3.2	Simulations and Technical Definitions . . . . .	50
3.2.1	Simulations . . . . .	50
3.2.2	Halo and subhalo definition . . . . .	52
3.2.3	Shape parameter definitions . . . . .	52
3.2.4	Axes and misalignment angle definition . . . . .	53
3.3	The effect of galaxy formation efficiency . . . . .	54
3.4	Shape of the different components of haloes . . . . .	58
3.4.1	The shape of haloes . . . . .	58
3.4.2	Shape of the stellar component of haloes . . . . .	58
3.4.3	Shape of the hot gas component of haloes . . . . .	62
3.5	Misalignment of Galaxies with their own host haloes . . . . .	63
3.5.1	Misalignment of stars with their host haloes . . . . .	64
3.5.2	Misalignment of hot gas with its host halo . . . . .	70
3.6	Summary and Conclusions . . . . .	71
3.A	Caveats in shape parameter estimation . . . . .	75

3.A.1	The choice of inertia tensor . . . . .	75
3.A.2	The effect of sampling . . . . .	76
3.B	Analytic fits for the misalignment angle distributions . . . . .	78
3.C	Resolution test . . . . .	79
<b>4</b>	<b>Intrinsic Alignments in EAGLE and COSMO-OWLS</b>	<b>81</b>
4.1	Introduction . . . . .	82
4.2	Simulations and Technical Definitions . . . . .	84
4.2.1	Simulations . . . . .	84
4.2.2	Halo and subhalo definition . . . . .	85
4.2.3	Shape parameter definitions . . . . .	87
4.3	Orientation-direction alignment . . . . .	87
4.3.1	Dependence on subhalo mass and separation . . . . .	87
4.3.2	Dependence on the choice of matter component . . . . .	90
4.3.3	Dependence on galaxy morphology . . . . .	91
4.3.4	Alignment of satellite and central galaxies . . . . .	92
4.4	Towards observations of orientation-direction galaxy alignment . . . . .	95
4.5	Orientation-orientation alignment . . . . .	98
4.6	Conclusions . . . . .	99
<b>5</b>	<b>Galaxy-Galaxy lensing in EAGLE</b>	<b>105</b>
5.1	Introduction . . . . .	106
5.2	Methods . . . . .	107
5.2.1	KiDSxGAMA . . . . .	107
5.2.2	Simulations . . . . .	110
5.3	Results . . . . .	111
5.3.1	The galaxy-galaxy lensing signal around central galaxies . . . . .	113
5.3.2	The galaxy-galaxy lensing signal around satellite galaxies . . . . .	115
5.3.3	The galaxy-galaxy lensing signal around all galaxies . . . . .	117
5.4	Discussion . . . . .	123
5.5	Conclusions . . . . .	124
5.A	Convergence tests . . . . .	128
<b>6</b>	<b>Nederlandse Samenvatting</b>	<b>131</b>
6.1	Dit Proefschrift . . . . .	131
