Tales of Orion : the interplay of gas, dust, and stars in the interstellar medium

Ochsendorf, B.B.

Author: Ochsendorf, Bram Benjamin
Title: Tales of Orion : the interplay of gas, dust, and stars in the interstellar medium
Issue Date: 2015-09-01

Tales of Orion

The interplay of gas, dust, and stars
in the interstellar medium

Cover design: Angelica Consejo. Background image credit front cover (adapted): Rogerio Bernal Andreo (Deep Sky Colors). Image credit back cover (adapted): J. Bally/D. Devine/B. Reipurth/NOAO/AURA/NSF.

Tales of Orion

The interplay of gas, dust, and stars
in the interstellar medium

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C. J. J. M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 1 september 2015
klokke 15:00 uur

door

Bram Benjamin Ochsendorf

geboren te Wijhe
in 1986

Promotiecommissie

Promotores:	Prof. dr. A. G. G. M. Tielens	
	Prof. dr. L. Kaper	(University of Amsterdam)
Overige leden:	Prof. dr. J. Bally	(University of Colorado at Boulder)
	Prof. dr. B. T. Draine	(Princeton University)
	Prof. dr. M.-M. Mac Low	(American Museum of Natural History)
	Prof. dr. P. P. van der Werf	
	Prof. dr. H. J. A. Röttgering	

Contents

1 Introduction **9**
1.1 The interstellar medium . . . 11
1.1.1 Infrared missions . . . 12
1.1.2 Interstellar dust . . . 14
1.2 The interplay of gas, dust, and stars . . . 15
1.2.1 Formation and evolution of H II regions and wind-blown-bubbles 15
1.2.2 OB associations, supernovae, and superbubbles . . . 19
1.2.3 Dust as a tracer and intermediary of radiative feedback . . . 22
1.2.4 Summary: the energy balance of the ISM . . . 24
1.3 Orion as a benchmark study . . . 25
1.4 This thesis . . . 27

2 Blowing in the wind: The dust wave around σ Ori AB **29**
2.1 Introduction . . . 30
2.2 Observations . . . 31
2.3 Stellar properties and local physical conditions . . . 32
2.3.1 Basic stellar properties and space velocities . . . 32
2.3.2 Wind properties . . . 34
2.3.3 Photo-evaporation flow . . . 35
2.4 Bow waves and dust waves . . . 36
2.4.1 Dust distribution . . . 37
2.4.2 Dust mass . . . 38
2.5 Physics of bow waves and dust waves . . . 40
2.5.1 Dust component . . . 40
2.5.2 Gas component . . . 42
2.5.3 Modeling the interaction between the flow and σ Ori AB . . . 42
2.6 Results . . . 44
2.6.1 Coulomb interactions . . . 46
2.6.2 Bow shock scenario . . . 48
2.7 Discussion . . . 50
2.7.1 Grain charge and Coulomb interaction . . . 54
2.8 Conclusion . . . 56
2.A IR arcs around candidate weak-wind stars . . . 57

3 A bimodal dust grain distribution in the IC 434 H II region **59**
3.1 Introduction . . . 60
3.2 Observations . . . 61
3.3 The expanding H I shell surrounding Orion OB1b . . . 61
3.3.1 The GS206-17+13 shell: mass and kinetic energy . . . 61
3.3.2 Driving source of the GS206-17+13 shell . . . 63
3.3.3 Space velocities of Orion OB1b and approach of σ Ori . . . 64
3.4 Dust emission from the IC 434 region . . . 65
3.4.1 Morphological structures . . . 65
3.4.2 Spectral energy distributions . . . 67

3.4.3 Are we tracing emission from the ionized gas? 67
3.5 The flow of dust into the IC 434 region 76
3.5.1 Modeling the flow of ionized gas 76
3.5.2 Flow parameters 78
3.5.3 The formation of dust waves 80
3.5.4 The equilibrium- and minimum radius of a dust wave 81
3.6 Modeling results 83
3.6.1 A bimodal dust distribution 83
3.7 Discussion 85
3.7.1 Derived dust properties 85
3.7.2 Limitations of the model 87
3.7.3 PAH emission from the ionized gas 88
3.8 Conclusions 89

4 Radiation-pressure-driven dust waves inside bursting interstellar bubbles 91
4.1 Introduction 92
4.2 Observations and method 93
4.2.1 Hydrodynamical simulations 93
4.3 Results 93
4.3.1 Hydrodynamical simulations of RCW 120 95
4.3.2 Model for dusty photo-evaporation flows 98
4.3.3 Location of dust waves and dust-gas coupling 100
4.4 Discussion and conclusion 103

5 Nested shells reveal the rejuvenation of the Orion-Eridanus superbubble 107
5.1 Introduction 108
5.2 Observations 108
5.3 Results 109
5.3.1 Dust in Barnard's Loop 109
5.3.2 Dust and gas in the Orion-Eridanus superbubble 112
5.3.3 Expanding shells within the Orion-Eridanus region 118
5.4 Discussion 123
5.4.1 An updated picture of the Orion-Eridanus superbubble 124
5.4.2 The nested shells and their relation to Orion OB1 131
5.4.3 Evolution of the Orion-Eridanus superbubble 132
5.4.4 Dust processing in superbubbles 140
5.5 Summary 141

6 Summary & outlook 143
