Title: Positive representations on ordered Banach spaces

Issue Date: 2013-11-27

Positive representations on ordered Banach spaces

PROEFSCHRIFT

TER VERKRIJGING VAN
DE GRAAD VAN DOCTOR AAN DE UNIVERSITEIT LEIDEN,
OP GEZAG VAN DE RECTOR MAGNIFICUS
PROF. MR. C.J.J.M. STOLKER,
VOLGENS BESLUIT VAN HET COLLEGE VOOR PROMOTIES
TE VERDEDIGEN OP WOENSDAG 27 NOVEMBER 2013
KLOKKE 16.15 UUR

DOOR

Hendrik Jacobus Michiel Messerschmidt

GEBOREN TE VANDERBIJLPARK, ZUID-AFRIKA IN 1984.

Promotiecommissie:

Promotor:	prof. dr. A. Doelman	(Universiteit Leiden)
Copromotor:	dr. M.F.E. de Jeu	(Universiteit Leiden)
Overige leden:	prof. dr. B. de Pagter	(Technische Universiteit Delft)
	prof. dr. N.P. Landsman	(Radboud Universiteit Nijmegen)
	prof. dr. P. Stevenhagen	(Universiteit Leiden)
	dr. O.W. van Gaans	(Universiteit Leiden)
	prof. dr. A.W. Wickstead	(Queen's University Belfast)

The author's research was supported by a Vrije Competitie grant of the Netherlands Organisation for Scientific Research (NWO).

Positive representations
on ordered Banach spaces

Contents

1	Introduction	7
1.1	Pre-ordered Banach spaces	9
1.1.1	Continuous generation	9
1.1.2	Normality of spaces of operators	12
1.1.3	Quasi-lattices	13
1.2	Crossed products	15
1.2.1	Crossed products of Banach algebras	15
1.2.2	Crossed products of pre-ordered Banach algebras	18
2	Right inverses of surjections from cones onto Banach spaces	21
2.1	Introduction	21
2.2	Preliminaries	25
2.2.1	Subsets of vector spaces	25
2.2.2	Cones	26
2.2.3	Correspondences	27
2.3	Main results	27
2.4	Applications	36
3	Normality of spaces of operators and quasi-lattices	43
3.1	Introduction	43
3.2	Preliminary definitions and notation	45
3.3	Normality and Conormality	45
3.4	The normality of pre-ordered Banach spaces of bounded linear operators	52
3.5	Quasi-lattices and their basic properties	57
3.6	A concrete class of quasi-lattices	64
3.7	A class of quasi-lattices with absolutely monotone spaces of operators	67
4	Crossed products of Banach algebras	73
4.1	Introduction and overview	73
4.2	Preliminaries and recapitulation	75
4.3	Varying \mathcal{R}	78
4.4	Uniqueness of the crossed product	82
4.5	Generalized Beurling algebras as crossed products	88

4.6	Other types for (π, U)	105
4.7	Several Banach algebra dynamical systems	111
4.8	Right and bimodules over generalized Beurling algebras	115
5	Crossed products of pre-ordered Banach algebras	125
5.1	Introduction	125
5.2	Preliminaries and recapitulation	128
5.2.1	Pre-ordered vector spaces and algebras	128
5.2.2	Pre-ordered normed spaces and algebras	129
5.2.3	Representations on pre-ordered normed spaces	133
5.2.4	Banach algebra dynamical systems and crossed products . . .	135
5.2.5	The correspondence between representations of (A, G, α) and $(A \rtimes_{\alpha} G)^{\mathcal{R}}$	136
5.3	Pre-ordered Banach algebra dynamical systems and crossed products	137
5.3.1	Pre-ordered Banach algebra dynamical systems	138
5.3.2	Crossed products associated with pre-ordered Banach algebra dynamical systems	139
5.3.3	The correspondence between positive representations of (A, G, α) and $(A \rtimes_{\alpha} G)^{\mathcal{R}}$	141
5.4	Uniqueness of the pre-ordered crossed product	143
5.5	Pre-ordered generalized Beurling algebras	148
	Acknowledgements	161
	Samenvatting	163
	Curriculum Vitæ	169
