Author: Messerschmidt, Hendrik Jacobus Michiel
Title: Positive representations on ordered Banach spaces
Issue Date: 2013-11-27

Acknowledgements

Firstly, I would like to thank my supervisor Marcel de Jeu for his guidance and his unparalleled thoroughness. Secondly, all my colleagues and friends at Leiden University deserve my thanks, specifically Marten Wortel, for the countless number of discussions on ideas which ultimately did (and did not) make their way into this document, and *De Vrije Radicalen* for their respect for esoterica. Thanks to the many strangers (and lost connections) who became my friends (again) and made my years of expatriatism a little less lonely. If they read this, they will know who they are.

Lastly, I thank my parents, my brothers and my sister-in-law for their encouragement, support and boundless love.
