Gelatinases in Chronic Liver Disease

The Clinical Relevance of MMP-2 and MMP-9 in Orthotopic Liver Transplantation

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Dr. D.D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op dinsdag 31 mei 2005
klokke 14.15 uur

door

Johannes Philippus Kuyvenhoven
geboren te Katwijk
in 1965

Promotiecommissie

Promotor: Prof. dr. C.B.H.W. Lamers

Co-promotores: Dr. B. van Hoek
Dr. ir. H.W. Verspaget

Referent: Prof. dr. T.M. van Gulik, *AMC - Universiteit van Amsterdam*

Overige leden: mw. Dr. C.M.J. van Nieuwkerk, *VUMC - Vrije Universiteit Amsterdam*
Dr. J. Kwekkeboom, *EMCR - Erasmus Universiteit Rotterdam*
Prof. dr. T.W.J. Huizinga
Prof. dr. O.T. Terpstra

Contents

Chapter 1	Introduction Matrix metalloproteinases and liver disease: an overview. Outline of the studies described in this thesis.	9
Chapter 2	Assessment of the clinical significance of serum matrix metalloproteinases MMP-2 and MMP-9 in patients with various chronic liver diseases and hepatocellular carcinoma. <i>Thrombosis and Haemostasis 2003; 89: 718-725.</i>	25
Chapter 3	Plasma MMP-2 and MMP-9 and their inhibitors TIMP-1 and TIMP-2 during human orthotopic liver transplantation. The effect of aprotinin and the relation to ischemia/reperfusion injury. <i>Thrombosis and Haemostasis 2004; 91: 506-13.</i>	35
Chapter 4	Serum matrix metalloproteinase MMP-2 and MMP-9 in the late phase of ischemia and reperfusion injury in human orthotopic liver transplantation. <i>Transplantation Proceedings 2003; 35: 2967-2969.</i>	45
Chapter 5	Assessment of serum matrix metalloproteinases MMP-2 and MMP-9 after human liver transplantation: increased serum MMP-9 level in acute rejection. <i>Transplantation 2004; 77: 1646-1652.</i>	51
Chapter 6	Preanalytical conditions and circulating matrix metalloproteinases. <i>Transplantation 2005; 79: 745-746.</i>	61
Chapter 7	Matrix metalloproteinase (MMP)-2 and MMP-9 gene promoter polymorphisms in chronic liver disease - relation to ischemia/reperfusion injury and rejection after orthotopic liver transplantation.	65
Chapter 8	Summarizing discussion	79
	Samenvattende discussie	85
	List of publications	89
	Nawoord	91
	Curriculum Vitae	93
