Title: Fear of falling in older patients after hip fracture

Issue Date: 2016-03-31

An abstract painting featuring a dark blue, textured background. A white, elongated, and somewhat distorted human figure is depicted, stretching across the middle of the frame. The figure's limbs are thin and elongated, with some red and pinkish tones interspersed within the white paint, suggesting internal structures or perhaps a sense of movement or tension. The overall composition is vertical, with the figure appearing to be in a state of falling or being pulled apart.
