Title: "Pinching subacromial problems" - A clinical and biomechanical approach -

Issue Date: 2015-03-12

“Pinching subacromial problems”

- A clinical and biomechanical approach -

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van Rector Magnificus prof. mr. C.J.J.M. Stolker,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 12 maart 2015
klokke 16:15 uur

door

Pieter Bas de Witte

geboren te Leuven

in 1982

Promotiecommissie:

Promotor: Prof. dr. R.G.H.H. Nelissen

Copromotor: Dr. J.H. de Groot

Overige leden: Prof. dr. R. Brand
Prof. dr. G. Kloppenburg
Prof. dr. R.L. Diercks, UMCG Groningen
Prof. dr. H.E.J. Veeger, VU Amsterdam
Mw. dr. P.M. Ludewig, University of Minnesota
Mw. dr. M. Reijnierse

Table of contents

Chapter 1	General introduction and outline of the thesis	9
Part 1A	What is Subacromial Impingement Syndrome?	23
Chapter 2	Communication breakdown: Clinicians disagree on subacromial impingement	25
Chapter 3	The Supraspinatus and the Deltoid: Not just two arm elevators	47
Chapter 4	Heterogeneous MR arthrography findings in patients with subacromial impingement syndrome: Diagnostic subgroups?	65
Chapter 5	Bursectomy versus acromionplasty in patients with subacromial impingement syndrome: A prospective randomized study	87
Part 1B	Calcific Tendinitis; a frequent cause of “impingement” symptoms	103
Chapter 6	Rotator cuff calcific tendinitis and long-term outcome: demographic and radiological predictors	105
Chapter 7	Calcific tendinitis of the rotator cuff: A randomized controlled trial of ultrasound-guided needling and lavage versus subacromial corticosteroids	127

Part 2	Novel outcome measures for patients with “impingement” symptoms	151
Chapter 8	The Western Ontario Rotator Cuff index in rotator cuff disease patients: A comprehensive reliability and responsiveness validation study	153
Chapter 9	Arm ADductor activation with arm ABduction in rotator cuff tear patients vs. healthy controls: Design of a new measuring instrument	173
Chapter 10	Cranial humerus translation, Deltoid activation, adductor co-activation and rotator cuff disease: Different patterns in rotator cuff tears, subacromial impingement and controls	191
Chapter 11	Pathologic Deltoid activation in rotator cuff tear patients: Normalization after cuff repair?	211
Part 3	Future implications and general discussion	229
Chapter 12	Study protocol on Subacromial Impingement Syndrome: The Identification of pathophysiologic Mechanisms (SISTIM)	231
Chapter 13	Summary and discussion	255
Chapter 14	General conclusions	265
Chapter 15	Samenvatting (layman’s summary in Dutch)	275
Bibliography		280
Curriculum Vitae		284
Dankwoord		285
