The Lambert-Eaton myasthenic syndrome

Clinical, epidemiological and immunological studies

Paul W. Wirtz

Cover photograph: Shells of the marine snails *Conus magus* and *Conus geographus*, which prey on fish by injecting ω -conotoxins. These toxins block P/Q-type and N-type voltage-gated calcium channels.

Printing: Febodruk B.V.

ISBN-10: 90-9019914-4

ISBN-13: 9789090199146

The Lambert-Eaton myasthenic syndrome

Clinical, epidemiological and immunological studies

Proefschrift

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden,
op gezag van de Rector Magnificus Dr. D.D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op maandag 7 november 2005
klokke 15.15 uur

door

Paul Willem Wirtz
geboren te Utrecht in 1971

Promotiecommissie

Promotor:

Prof.dr. A.R. Wintzen

Co-promotor:

Dr. J.J.G.M. Verschuuren

Referent:

Prof.dr. J.H. Wokke (Universiteit Utrecht)

Overige leden:

Prof.dr. J.B. Kuks (Rijksuniversiteit Groningen)

Dr. B.O. Roep

This research project was supported by a grant of the Prinses Beatrix Fonds (project-number 97-0213).

Contents

Introduction

- | | |
|--------------------------|---|
| 1. Introduction and aims | 7 |
|--------------------------|---|

The epidemiology of the Lambert-Eaton myasthenic syndrome

- | | |
|---|----|
| 2. The epidemiology of myasthenia gravis, Lambert-Eaton myasthenic syndrome and their associated tumours in the northern part of the province of South Holland (<i>J Neurol 2003;250:698-701</i>) | 21 |
| 3. The epidemiology of the Lambert-Eaton myasthenic syndrome in the Netherlands (<i>Neurology 2004;63:397-398</i>) | 31 |

Clinical characteristics of LEMS

- | | |
|---|----|
| 4. Difference in distribution of muscle weakness between myasthenia gravis and the Lambert-Eaton myasthenic syndrome (<i>J Neurol Neurosurg Psychiatry 2002;73:766-768</i>) | 37 |
| 5. Differences in clinical features between the Lambert-Eaton myasthenic syndrome with and without cancer: an analysis of 227 published cases (<i>Clin Neurol Neurosurg 2002;104:359-363</i>) | 45 |
| 6. The Lambert-Eaton myasthenic syndrome has a more progressive course in patients with lung cancer (<i>Muscle & Nerve 2005;32:226-229</i>) | 57 |
| 7. Associated autoimmune diseases in patients with the Lambert-Eaton myasthenic syndrome and their families (<i>J Neurol 2004;251:1255-1259</i>) | 65 |

Immunopathogenesis of LEMS

- | | |
|--|-----|
| 8. HLA class I and II in Lambert-Eaton myasthenic syndrome without associated tumour (<i>Hum Immunol 2001;62:809-813</i>) | 77 |
| 9. High innate production of interleukin-10 and tumour necrosis factor- α contributes to susceptibility for non-paraneoplastic Lambert-Eaton myasthenic syndrome (<i>J Neuroimmunol 2003;140:194-197</i>) | 87 |
| 10. HLA and smoking in prediction and prognosis of small cell lung cancer in autoimmune Lambert-Eaton myasthenic syndrome (<i>J Neuroimmunol 2005;159:230-237</i>) | 97 |
| 11. P/Q-type calcium channel antibodies, Lambert-Eaton myasthenic syndrome and survival in small cell lung cancer (<i>J Neuroimmunol 2005;164:161-165</i>) | 115 |

Therapy of LEMS

12. Efficacy of 3,4-diaminopyridine and pyridostigmine in the Lambert-Eaton
myasthenic syndrome 125

Conclusions

13. Summary and conclusions 137

Nederlandse samenvatting en conclusies 147
