Author: Askes, S.H.C.
Title: Converting nanovesicles for the activation of ruthenium anti-cancer prodrugs with red light
Issue Date: 2016-11-24

UPCONVERTING NANOVESICLES FOR THE ACTIVATION OF RUTHENIUM ANTI-CANCER PRODRUGS WITH RED LIGHT

PROEFSCHRIFT

Ter verkrijging van

de graad van Doctor aan de Universiteit Leiden,

op gezag van Rector Magnificus Prof. mr. C. J. J. M. Stolker,

volgens besluit van het College voor Promoties

te verdedigen op donderdag 24 november 2016

klokke 10:00 uur

Sven Holger Christiaan Askes

geboren te Culemborg, Nederland, 1989

Samenstelling Promotiecommissie

Promotor

Prof. dr. E. Bouwman

Copromotor

Dr. S. Bonnet

Overige Leden

Prof. dr. J. Brouwer

Prof. dr. A. Kros

Prof. dr. S. Baluschev
Verbonden aan Sofia University "St. Kliment Ochridski" (Bulgarije) en Max Planck Institute for Polymer Research (Mainz, Germany)

Dr. F. C. Grozema
Verbonden aan Technische Universiteit Delft

Dr. L. Salassa
Verbonden aan Centre for Cooperative Research in Biomaterials "CIC biomaGUNE" (San Sebastián, Spain)

"Just remember, you can't climb the ladder of success with your hands in your pockets"

Arnold Schwarzenegger

"Those worlds in space are as countless as all the grains of sand on all the beaches of the Earth. Each of those worlds is as real as ours. In every one of them, there's a succession of incidences, events, occurrences which influence its future. Countless worlds, numberless moments, an immensity of space and time. And our small planet, at this moment, here we face a critical branch-point in the history. What we do with our world, right now, will propagate down through the centuries and powerfully affect the destiny of our descendants. It is well within our power to destroy our civilization, and perhaps our species as well. If we capitulate to superstition, or greed, or stupidity we can plunge our world into a darkness deeper than the time between the collapse of classical civilization and the Italian Renaissance. But we are also capable of using our compassion and our intelligence, our technology and our wealth to make an abundant and meaningful life for every inhabitant of this planet. To enhance enormously our understanding of the Universe, and to carry us to the stars."

Carl Sagan

Dedicated to all great minds of past and present,
on whose shoulders we may stand.

Table of Contents

Chapter 1 7

Introduction I: Ruthenium polypyridyl complexes as potential anticancer prodrugs in photoactivated chemotherapy

Chapter 2 21

Introduction II: Light upconversion using triplet-triplet annihilation

Chapter 3 43

Activation of a photodissociative ruthenium complex by triplet-triplet annihilation upconversion in liposomes

Chapter 4 59

Triplet-triplet annihilation upconversion followed by FRET for the red light activation of a photodissociative ruthenium complex in liposomes

Chapter 5 81

Imaging the lipid bilayer of giant unilamellar vesicles using red-to-blue light upconversion

Chapter 6 95

Temperature dependence of triplet-triplet annihilation upconversion in phospholipid membranes

Chapter 7 109

Synthesis and in-vitro application of upconverting silica-coated liposomes

Chapter 8 135

Activation of liposome-bound Ru(II) prodrugs using red-to-blue triplet-triplet annihilation upconversion in a biological context

Chapter 9 179

Imaging upconverting polymersomes in cancer cells: biocompatible anti-oxidants brighten triplet-triplet annihilation upconversion

Chapter 10 203

Summary, conclusions, and outlook

Appendix I : Determination of quantum yield of upconversion 215

Appendix II : Supporting information for Chapter 3 221

Appendix III : Supporting information for Chapter 4 223

Appendix IV : Supporting information for Chapter 5 245

Appendix V : Supporting information for Chapter 6 251

Appendix VI : Supporting information for Chapter 7 253

Appendix VII : Supporting information for Chapter 8 257

Appendix VIII : Supporting information for Chapter 9 267
