Copper complexes
as biomimetic models of catechol oxidase:
mechanistic studies

PROEFSCHRIFT

ter verkrijging van
de graad van Doctor aan de Universiteit Leiden
op gezag van de Rector Magnificus Dr. D. D. Breimer,
hoogleraar in de faculteit der Wiskunde en
Natuurwetenschappen en die der Geneeskunde,
volgens besluit van het College voor Promoties
te verdedigen op donderdag 2 februari 2006
klokke 16:15 uur

door

Iryna A. Koval

Geboren te Kyiv, Oekraïne in 1979

Samenstelling promotiecomissie

Promotor: Prof. Dr. J. Reedijk

Co-promotor: Dr. P. Gamez

Referent: Dr. C. Belle (Université J. Fourier, Grenoble, Frankrijk)

Overige Leden: Prof. Dr. J. Brouwer
Prof. Dr. B. Krebs (Westfälische Wilhelms-Universität Münster,
Duitsland)
Dr. E. Bouwman

The cover of this thesis depicts a painting of Vincent van Gogh “Almond blossom”. It was chosen to acknowledge Van Gogh Program, a joined collaborative grant of French Ministry of Research and Foreign Affairs (EGIDE) and NWO which allowed visits and exchange between Leiden University and Université J. Fourier (Grenoble, France) within the framework of research reported in this thesis. This research was further supported by the NRSC Catalysis (a Research School Combination of HRSMC and NIOK).

“A scientist in his laboratory is not a mere technician: he is also a child confronting natural phenomena that impress him as though they were fairy tales.”

Marie Skłodowska Curie

“I think, therefore I am”

René Descartes

Table of Contents

Chapter 1.	Introduction.....	7
Chapter 2.	Synthetic route to novel asymmetric dinucleating ligands. Crystal structure and properties of the complex [Cu ₂ (py3asym)(H ₂ O) _{1.5} (NO ₃) _{2.5}](NO ₃) _{0.5}	51
Chapter 3.	Structural diversity in Cu ^{II} , Co ^{II} and Mn ^{II} complexes of a phenol-based ligand containing amine, pyridine and formyl functions: 3D structures and solution studies.....	63
Chapter 4.	Dinuclear Cu ^{II} complexes with the new phenol-based ligand bearing pyridine and thiophene substituents: synthesis, characterization and interaction with catechol substrates.....	89
Chapter 5.	X-ray 3D structures and properties of two copper(II) complexes with the asymmetric phenol-based N,O,S-ligand. Influence of the counter ion on the crystal packing.....	109
Chapter 6.	Proton NMR spectroscopy and magnetic properties of a solution-stable dicopper(II) complex bearing a single μ -hydroxo bridge.....	125
Chapter 7.	Catecholase activity of a μ -hydroxodicopper(II) macrocyclic complex: structures, intermediates and reaction mechanism.....	149

Chapter 8.	Catecholase activity of a copper(II) complex with the macrocyclic ligand [22]pr4pz: unraveling catalytic mechanisms.....	169
Chapter 9.	Summary, general discussion and outlook.....	195
	Samenvatting (Summary in Dutch).....	207
	Короткий зміст (Summary in Ukrainian).....	211
	Curriculum Vitae.....	218
	List of publications.....	220
	Acknowledgement.....	221
